Product Information

Product ID A822686

CAS No. 574-95-8

Chemical Name N-(4-methyl-5-oxodithiolo[4,3-b]pyrrol-6-yl)propanamide

Synonym Farcinicin, Propionylpyrrothione; UNII-0KX00L19Q2;
0KX00L19Q2

Formula C₉H₁₀N₂O₂S₂

Formula Wt. 242.31

Melting Point

Purity ≥98%

Solubility

Store Temp -20°C

Ship Temp Ambient

Description Aureothricin is a member of the dithiopyrrolone family of antibiotics that are synthesized by *Streptomyces* species. Aureothricin is a chemical analog of thiolutin, another member of this family. The dithiopyrrolone family members contain a heterobicyclic core with a disulfide bridge between two ene-thiols. The dithiopyrrolone core gives these antibiotics a characteristic electronically unique structure.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
A822686	1 mg	\$50.00
A822686	5 mg	\$175.00
A822686	10 mg	\$325.00
