S687215	6 Tests	\$258.00
S687215	24 Tests	\$706.00

Store Temp 4°C

Ship Temp Blue Ice

**Description** FLIVO® (FLuorescence in vivo) is a powerful method for assessing caspase activity in vivo. SR-FLIVO® poly caspase probes are non-cytotoxic, cell-permeant fluorescent inhibitors of caspases optimized for use in whole live animals. The SR-FLIVO® poly caspase inhibitor probe contains the preferred binding sequence for most caspases (Val-Ala-Asp or VAD). This preferred poly caspase tripeptide binding sequence is labeled with a sulforhodamine B (SR) dye and a fluoromethyl ketone (FMK) reactive entity.
