Description FLIVO® (FLuorescence in vIVO) is a powerful method for non-invasive detection of caspase activity in vivo. NIR-FLIVO® 747 Tracers are non-cytotoxic, cell-permeant fluorescent inhibitors of caspases optimized for use in whole live animals. NIR-FLIVO® 747 Tracer probe contains the preferred binding sequence for most caspases (Val-Ala-Asp or VAD). This preferred poly caspase tripeptide binding sequence is labeled with *Dylight® 747 dye and a fluoromethyl ketone (FMK) reactive entity.

FLIVO® is a registered trademark of Immunochemistry Technologies, LLC. *Dylight® is a registered trademark of Thermo Fisher Scientific, Inc. and its subsidiaries.
