| Product ID | Size | List Price |
|------------|--------|------------|
| B023731 | 25-250 | \$295.00 |

Store Temp 4°C

Ship Temp Blue Ice

Description Basic Calcein AM Cell Viability Kit allows researchers to easily and simultaneously differentiate between live and dead cells within a single sample. To use Calcein AM, simply add the reagent directly to the cell sample, incubate, and analyze (no wash steps necessary). Samples can be analyzed using a flow cytometer, fluorescence plate reader, or fluorescent microscope.
