Product Information

Product ID T0095

CAS No. 27548-93-2

Chemical Name 7,11-Methano-5H-cyclodeca(3,4)benz(1,2-b)oxet-5-one-6,12b-bis(acetyloxy)-12-(benzoyloxy)-1,2a,3,4,4a,6,- 9,10,11,12,12a,12b-dodecahydro-4,9,11-trihydroxy-4a,- 8,13,13-tetramethyl-, (2aR-

Synonym

Formula C₃₁H₃₈O₁₁

Formula Wt. 586.63

Melting Point 229-234 °C

Purity ≥98%

Solubility Soluble in DMSO or ethanol.
Insoluble in water.

Store Temp -20 °C

Ship Temp Ambient

Description Baccatin III is a diterpene found in *Taxus* and various fungal organisms that exhibits immunomodulatory and anticancer chemotherapeutic activities. Unlike most taxanes, baccatin III does not bind tubulin; it is primarily used in the synthesis of taxol. In animal models of breast cancer and colon cancer, baccatin III decreases tumor growth by suppressing accumulation of myeloid-derived suppressor cells. In other various cancer cell lines, this compound induces apoptosis and inhibits proliferation in a caspase 10-dependent manner. In bone marrow dendritic cells, baccatin III increases MHC class I and II antigen presentation; similarly, it increases cytotoxic T lymphocyte responses in vivo. TEST!!!!!!

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
T0095	5 mg	\$86.90
T0095	10 mg	\$172.20
T0095	25 mg	\$367.20
