Product Information

Product ID F441026

CAS No. 131740-09-5

Chemical Name

Synonym Flavopiridol HCl; Alvocidib hydrochloride; Alvocidib HCl

Formula $C_{21}H_{21}Cl_2NO_5$

Formula Wt. 438.30

Melting Point

Purity $\geq 98\%$

Solubility

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
F441026	5 mg	\$98.00
F441026	25 mg	\$325.00

Store Temp 4°C

Ship Temp Ambient

Description Flavopiridol hydrochloride is a plant-derived semisynthetic flavone that acts as a cyclin-dependent kinase inhibitor. Flavopiridol was found to induce apoptosis in chronic lymphocytic leukemia cells in vitro, but significant toxicity has prevented further development as a single agent treatment. A combination treatment using cytarabine and mitoxantrone in addition to flavopiridol against acute myeloid leukemia in vivo has also been evaluated. Further studies have found flavopiridol to elicit anti-inflammatory activity via CDK9 and NFkB-dependent signaling. TEST!!!!!!
