Product Information

Product ID L960002

CAS No. 934389-88-5

Chemical Name

Synonym LY294002 HCl

Formula $C_{19}H_{17}NO_3 \cdot HCl$

Formula Wt. 343.81

Melting Point

Purity $\geq 98\%$

Solubility

Store Temp Ambient

Ship Temp Ambient

Description Water soluble form of LY-294002 (L4796). LY-294002 is an inhibitor of PI3K that is used to sensitize cancer cells to other co-administered anticancer chemotherapeutics. In macrophages and monocytes, LY-294002 inhibits NF- κ B activity and decreases levels of p50 NF- κ B; it also inhibits LPS-induced expression of IL-10. LY-294002 prevents ruffled border formation in osteoclasts by altering the binding of acidic vacuoles with the intercellular membrane. Additionally, this compound inhibits DNA-dependent protein kinase (DPK) activity and prevents the formation of NO. TEST!!!!!!

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
L960002	1 mg	\$35.00
L960002	5 mg	\$75.00
L960002	25 mg	\$215.00
L960002	100 mg	\$600.00
