Description LX-2343 improves cognitive dysfunction in APP/PS1 transgenic mice through the inhibition of A β accumulation and the promotion of A β clearance. This anti-amyloid effect shows LX-2343's potential as a therapy for Alzheimer's disease. LX-2343 reduces neuronal apoptosis by alleviating oxidative stress and inhibiting JNK/p38 and pro-apoptotic pathways. It also shows activity as a non-ATP competitive GSK-3 β inhibitor. TEST!!!!!!
