She is the protagonist of the story (to tell a story in a mess like this is probably very positive in this film) and the film revolves around her aes (i.m. a wonderful pair of breasts). She is good at the role of the good-hearted upper class, coming from the lowest level of post-holocaust humanity presented in this film (a clash with a meteorite has destroyed life as we know it and survivors are divided into classes such as Time Machine's Morlocks and Eloi, but this time the good ones are the most humble of the survivor), and she gives her fan a lot to remember, with several naked scenes, but the mess in which she finds herself is really A classic new era of Corman made for the video movie, but one of the worst I've ever seen (and if you want to see Julie in all its glory, buy one of her Penthouse videos instead) 10 out of 15 found it useful.
