

COLD FOOD COUNTER

DineXpress®

Counter options and laminate panels available. Stainless steel panels standard.

Application

These DineXpress NSF 7 Cold Food Counters are designed to maintain safe food temperatures and meet NSF 7 guidelines. Food pans are recessed on rails inside the pan for maximum cooling without use of ice. The versatile modular design allows you to custom design either a cafeteria or a buffet unit to fit your line-up, choosing only the options and accessories that you want and need. DineXpress units are compatible and will interlock with other DineXpress units.

Construction

General: Units have a 16-gauge 300 series stainless steel top with 1-1/2" turn down on all sides.

Front and end panels are constructed of 18-gauge stainless steel. These panels can be removed without use of tools.

The cold pan is 9-7/16" deep and pitched to a 1" drain with a shut-off valve. The stainless steel pan is separated from the top by means of full perimeter plastic breaker strips.

Corner Posts: The corner posts are constructed of 14-gauge stainless steel.

Casters: The unit is mounted on 5" diameter, heavy-duty, non-marking swivel casters, 2 are fitted with brakes.

Cold Storage Optional System: The under-counter can include a 1/2 or 1/3 condensing unit. The refrigerant is type 134A. This design assures that food temperatures are always at the safe level.

Electrical: 120 volt, 1-phase with a 10' cord and NEMA 5-15P plug on base unit.
