

Finally a DLCO System is Available for the Physician Office

n d d Medical Technologies with its proven worldwide TrueFlow technology has developed a DLCO device that can be used in the physician office. The EasyOne Pro will allow Internal Medicine, Pulmonary, Cardiology and Primary Care offices to perform Spirometry, DLCO and lung volumes in their offices in less than 30 minutes.

Key advantages to the EasyOne Pro®

Cost Effective

- ROI in less than 200 patients
- No service contracts
- Reimbursement 4x greater than simple spirometry

Reliable

- Meets ATS/ERS standards
- Proven worldwide n d d TrueFlow™ technology
- First DLCO device developed using the DLCO simulator

Convenient

- Perform Spirometry, DLCO and Lung Volumes in 30 minutes
- Maintenance Free
- Calibration Free

Did you know that COPD is now the 3rd leading cause of death in the United States?

n d d Medical Technologies has developed the first portable single breath DLCO device using our TrueFlow Ultrasound Technology, allowing physicians to provide their patients with prompt, accurate diagnosis and treatment.

Your choice is an EasyOne.

Best for your Practice—Best for your Patients

TrueFlow
makes the difference
