Just like mom always told you,
“It’s what’s on the inside that counts.”

With the Professional Series, a commercially styled, heavy duty, high powered insert is now available for use in your very own home. Foremost makes inserts that are adaptable to fit most tapered, chimney, standard and shallow mantle types of wooden hoods that are being produced by the top manufacturers of kitchen cabinetry.

Take a look *Under the hood*

Within the durable stainless steel exterior, all models have a powerful German made motor providing the dynamic capabilities you demand from your kitchen hood. Power levels range from “whisper quiet” to maximum speeds of 600, 900 or 1800 CFM for optimal odor removal from your home.

Foremost has patented the smartest filters you'll find in any competitive insert around. Designed to look and perform like a commercial restaurant system, the non-clogging, large surface area stainless steel baffle filters are easily removable and split in half to fit right into a standard sized dishwasher.

[Above] Foremost #FRHI-48S displayed in a Covered Bridge Cabinetry mantle hood in the Madison Door Style with Spice Stain and a Glaze Finish

The 30S, 36S, 42S, and 48S models are designed to fit into the standard hood openings for either a 19 inch deep or a 24 inch deep “Chimney” style wooden hood or mantle. The specific model you require is dependent on the width of your wooden hood.

[Above] Foremost #FRHI-42M displayed in a Covered Bridge Cabinetry Shallow Mantle hood in a Deerfield Door Style with a Mystic Black Stain and a Retro Finish

If your preference is for a shallow mantle design above your oven in your beautiful kitchen, then the 42M model insert is appropriate. The 42M model is ultra compact and is able to fit directly into most brands of 42 inch wide shallow mantle wood range hoods with no additional metal liner or modifications required.

[Above] Foremost #FRHI-30T displayed in a Covered Bridge Cabinetry tapered hood in the Deerfield Door Style with Spice Stain and a Glaze Finish

The 30T and 36T are designed to fit into Tapered style wooden range hoods. The specific model you require is dependent on the width of your wooden hood. Both models maximize the use of the full bottom opening for its non clogging baffle filters, providing 600 CFM of exhaust power - the most available for this type of installation.

Make Up Air *Compatible*

All models of Foremost range hood inserts are make up air system ready to power external make up air inlet vents ***if required by local codes***. Each one can also be configured upon installation to vent to the outside of your home, or to recirculate through an optional carbon filter recirculation kit. Our range hood inserts are compatible with all make up air systems on the market.

Convenient Features

The convenience factors of Foremost hood inserts will surely set the benchmark for what consumers should expect from their appliances today.

All models feature:

- The brightest energy efficient LED lights, providing pleasing light for better color rendition of food.
- Four light settings that range from night light to full intensity.
- A built in heat sensor that automatically turns the exhaust fan on when high heat is detected.

Complete Control

Cooking a large meal with all burners going? Our remote control allows you to control your vent power and cooking light without having to stand directly in front of, or having to reach above, hot, steaming pots.

The remote control has advanced functionality for your added convenience. Set the "Delay" and walk away. "Delay" allows you to leave the fan running for a three minute cool down period, automatically turning the ventilator off while you are elsewhere enjoying your meal. Set the "Memory" for reserving fan and lighting settings that you like to use the most.

Alternatively, you can always control the lighting and ventilation levels with the convenient knobs on the underside of the hood.

Features

Replaces Standard Hood Liners
Ultra Bright Energy Efficient LED Lights
Easy Clean—Dishwasher Safe Filters
Heat Detector for Auto Turn On
High Powered Remote Control
Carbon Filter Recirculation Ready
Make Up Air System Ready
Brushed Stainless Steel Baffles and Body
