# Shopper at a Store

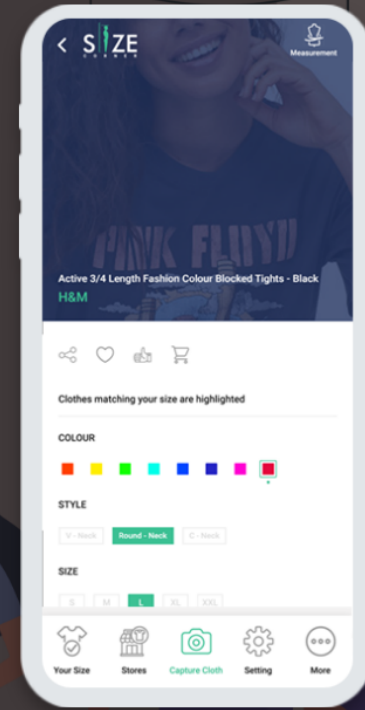

## Problem

At a clothing store, a shopper usually has to spend considerable time to find the ideal size, style, color and price.

## Solution

This mobile app suggests the ideal clothing size to purchase with a comprehensive view of each clothes, including the available sizes, styles, colors, by simply scanning the clothes at the store.

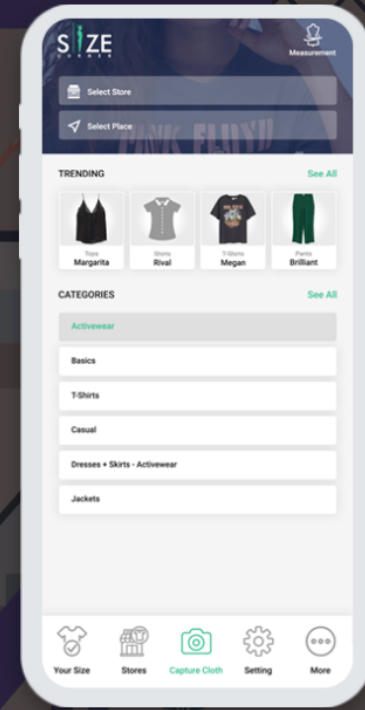

# Shopper at a Mall/Street

## Problem

At a shopping complex, how a shopper knows which store has the clothes that fit them?

## Solution

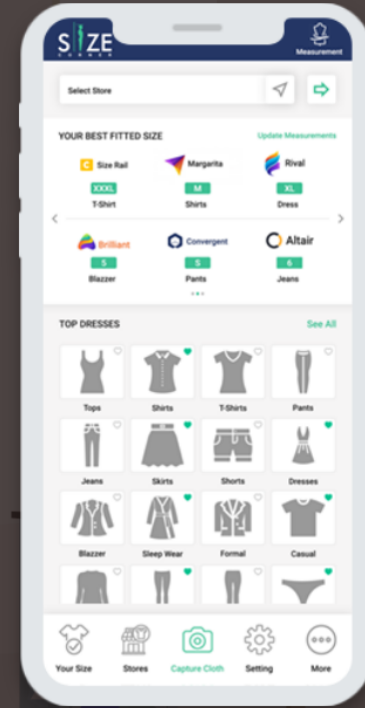

The shopper can search for the desired type of clothes in the app to find all the stores nearby which has the apparel that fits their size profile with information such as available colors and styles.

# Shopper at Home

## Problem

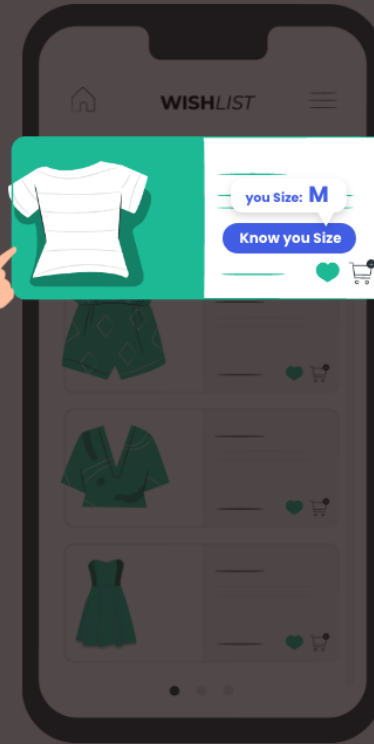

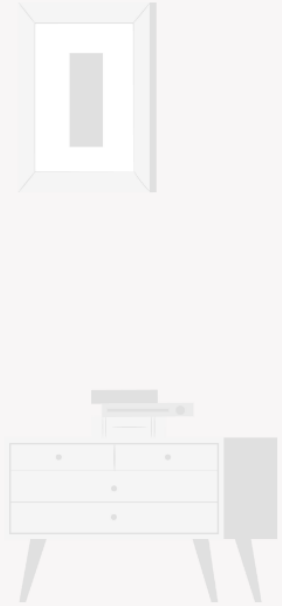

A shopper wants new clothes for an occasion or fancies finding apparel they saw on the TV or a Social media platform.

## Solution

The shopper can capture the picture of the clothes they wish to buy and search in the mobile app. It will list the nearby stores or eCommerce platforms to purchase the apparel in their ideal size.

# Shopper at the Product View

## Problem

A shopper struggles to find their ideal size in the available sizes and has trouble interpreting the size chart.

## Solution

Size Guarantee recommends the ideal clothing size for the shopper based on their measurements. It also shows the available colors and styles for the selected clothing item on the product view page itself.

# Shopper shopping on an apparel site

## Problem

A shopper has to view every product to find whether the product has the shopper's size, preferred style or not.

## Solution

Size Guarantee can list all the clothing products that match the shopper's size profile. The shopper can also specify the preferred clothing style in their profile to find the right clothes easily.

# Shopper Shopping Online

## Problem

There is no platform where shoppers can find their ideal size and style online across various leading eCommerce companies.

## Solution

Size Interface helps shoppers by enabling them to search across various eCommerce companies and list only the clothing products that have their ideal clothing size, preferred style, location and price.
