

Endnotes: Transcending old paradigms, Cosmological Relativity effectively unifies Relativity with Quantum Mechanics while avoiding incompatible maths. For physicists open to breakthrough understandings of fundamental physics this holographic hyperspherical perspective of space & time resolves Dark Energy, and 'Dark Flow'. Our Milky Way has been expanding 13.8 billion years

upward along with the whole universe from "a" onto "z". Meanwhile, Galaxy 2 expanded away from "A" towards the right "Z". Light rays from each galaxy are depicted as spiral pathways for photons stair stepping their way along the ever-expanding event horizon of the Black Whole, we call our universe. Each onion layer represents 1.3478×10^{41} Planck seconds. Notice each successive billion years adds one more arc. Thus, the accelerated expansion is caused by this ever-increasing Planck seconds/second. Time flows opposite for galaxies on opposite sides balancing matter & antimatter. It also lays the foundation for resolving Dark Matter and Quantum Gravity.
