

## THE MANDATORY REQUIRED AND OVERALL SOLUTION FOR FUTURE

### **The mandatory required for any of the future plans of Humanity**

"How Should Humanity Steer the Future?" Can also be interpreted as : We want a future like? Of course there will be a lot of measures are proposed , and also easy to understand that there will be so many conflicting opinions , in opposition to each other because they are formed from the ideological point of view and entirely different individuals .

However, the Absolute theory 2011 ( TTD 2011 ) assertion that :

*In the same kind of physical condition or phenomenon, absolute will always have same of the basic elements as one the common point .*

Hence, whether Human beings have devised how many methods to steer future matter - then it will also always be must have a common core objectives.

The common core objectives - or more specifically : what is the mandatory required for any of the future plans of Humanity ?

Explaining on Physics and Cosmology of the Absolute theory for this problem as follows :

#### **1 . Regarding Physical meaning :**

*Everything , absolutely always have limits , each of the Limit will be to constitutes one of the Physical Status , Physical Status are dependent and always interacts with its surroundings , and along with the adjacent Physical Status form a larger limit : is called a set of Physical Status , The value of each set of Physical Status is entirely depends on the qualities condition of all of the Physical Status inside of it - it's Absolute nature of the space as well as for any particular individuals - according to TTD2011.*

#### **2 . During scale Universe :**

Let us see the Earth as a Physical Status , and the Solar system is a limits of set including the Earth . That means: our Earth will always interact with other components in the solar system , as well as completely dependent on them , and vice versa - of course, life on Earth is too . Or more specifically : the lifespan of each of the Physical Status (in addition to the ability itself ) is completely dependent on the environment that contains it - whether the Earth or the solar system also likewise.

From the above explanation , we can notice that : Time to survive of any Physical Status ( Every single one of us is a Physical Status ) is totally dependent by own value ( or possibility ) and space that contains of itself - That is the core element of life - and of course that will be : Mandatory required for any future plans of Humanity - if we want going to be the future , the most essential is we must be still alive - and if you want to have more opportunities ( or time ) to live then the most important thing is we have to rely on much more Spaces of various regions in the Universe .

Therefore , the development of human life outside the framework of the Earth can be called :

### **The Space - Time mission .**

Why should we consider The Space - Time mission is mainly oriented criteria of any plans for the future of humanity ?

If we do not follow that trend , the future of humanity will be like ?

Even after this time about 3.5 billion years the Sun will not be shining ( Based on very optimistic forecasts and not enough solid base ) then it is also does mean that : The future of humanity will be known also like : we have known about dinosaurs in the past - That 's not to mention so many other endangered that we have plenty of information as well as clear evidence to believe , such as epidemics, natural disasters or war ...

The most pressing issue is:

- 1 . Mankind can create the same environment as on Earth in the space outside the solar system ?
- 2 . Renovated We can be human nature suitable for all types of environments in the Universe ?

Both the above schemes same can meet desire for a future of our Eternal .

But option 1 is more feasible , because we have the template available of Creator - that is the Earth's biosphere - and the origin of the theory of Absolute is based on the finding the absolute nature of the habitat , with a statement to confirm :

*Whether it is formed from the spontaneous random or is being deliberately Tectonics then : with the same result , absolute would be have same principle done .*

That also mean is : TTD2011 can provide formulas and measures to we create artificial habitats at any place in the universe , based on the guidance of the Creator . Or as we often hear : " Follow the teachings of God " - in this case , my position would be the same as a translator.

But with option 2 is probably to wait when there is so much to the success of the plans 1 at different spatial regions to identify specific bases .

Thus , we can conclude that :

**Natural Remedies** is the absolute norm !

Currently, possible that it is still a distant dream and very fragile for us , because before do it we need to solve the problem for a near future more to be able to focus the full power of Humanity for the future of each Humans in us .

However, to all of humanity can work together for a common career then we will be faced with peculiar problems of Humans : the divergence in thinking .

That is : the " life - death " contradictions in the internal affairs of Mankind - or more precisely, that is the most basic requirement :

How can mankind get sociable in the future ?

With entitled : A final theory for All ! We can totally rely on Absolute Theory 2011 to find a general solution for everyone .

## **Overall solution for every problem in our future**

How many problems of Human beings future ?

The temporary formula for calculation is : We will take the number of people ( Ng ) of Mankind multiplied by the time mankind has lived ( Tg - the unit : day ) then multiplied by with the constant c ( speed of light ) that is okay .

$$\text{Specifically : } \mathbf{Pr} \text{ ( problem )} = \mathbf{Ng} \times \mathbf{Tg} \times \mathbf{C}$$

That may be a vague formula there are no exact results , due to lack of specific data on Ng and Tg , but it sure would be a big answer .

The reason we do not need to know specific results is because : as a theory can solve for all should the total solution of Absolute Theory have capable of handling any number of every problem .

Overall solution based on the theory of Absolute course will focus on the absolute nature of issues need to be addressed .

As stated in the previous section , Key issues of humanity and all other life forms are : The Space - Time mission ! But to be able to be the future , certainly we need to expand space to enhance and prolong the life time .But that is a common problem for all forms of the life , The separate of Humanity with other life forms : That is intelligence !

The development of our thought is main reason to have generated problems for internal of Humanity : it is a matter of ideology or viewpoint of individual thinking . That mean is : the absolute nature of the problem to be solved with mankind is : The causes of internal conflict in Humanity : but it depends on the fundamental nature of the individual - or can be understood more simply as : Own needs , or more specifically : The purpose of each individual in us .

Personal purposes is not entirely unlimited But it does frequently to changes so it is difficult to determine . Fortunately, it depends mainly on its containing environment , so that problem that we absolutely must address is : Habitat - or the overall of society - of the entire humanity .

Does we need to have : A general view of the uniform Thinking ?

Because : the perspective of our thinking is completely different , so the criteria for a future building standards also 'll certainly very different - if do not want to say is : may also cancel each other out .

So, the Absolute common for Thinking of Mankind will be like ?

It is certain must be a criterion for life that any one of us also can not deny or doubt . Based on the theoretical perspective of the Absolute :

*With the condition of the same type , Absolute must always have a unique common !*

That mean is : the kind of Physical Status there Thinking as Human : absolute will have a unified point of thinking of individuals together - it was like we all agree the name calling to a certain object or incident such .

«The shared point in thinking» of us too .

That will be the point where a group of people - or most extended - all of Humanity is the same recognition . Absolute theory stated that :

*All same be Absolute Value in space and according to time !*

And that also means : there is not anything that can be called : Absolute values common to all .But also from this conclusion , we found that : Absolute values are common to all will is :

### **The Optional !**

( The Interpretation better for Optional as : All is determined depending on the synthesis of individual decisions . )

Therefore: The Optional is also the Absolute principle for interactive relationship of Everything together .

With issues of «The shared point in thinking» Humanity 's too - That will be the point in thinking where we must be have agreed with each other - it was like : we have the same consistency in the selection view : What things be edible , as well as certain things you should not eat it.

If so, we would have to do to determine :

How is The shared point in thinking for the Future of Humanity ?

The basic principle of the absolute theory is must be for the problem definition .

That is the first thing we must do is defined for the « The shared point about Future » that - before proceeding with any work related to it - to it can be applied .

So , how are plans will be fit for all of humanity in the future ?

In addition to The Space - Time mission as stated in the previous section , It is very easy to see that we will have to build a model society can ensure that all individual needs of humanity - it is like a garden is not only fragrant Flowers but also with Weeds or in forests will including both Food and things of Toxic as well as a Biosphere ( Where we live ) always with the same exist of love and hatred or Heaven and Hell ....and that is absolute imperative that we will have to accept to accomplish - because : Absolute theory presentations demonstrated that :

*Absolute can not have anything that is worth (standard ) for all !*

Actual life also confirmed that :

We eat in the mouth (what we give is tasty) and we will have discharged out ( what we give is dirty ) , if not have the concept of suffering , how to define what is happiness .

Fortunately, in daily life we still have the habit of separating Fragrant flowers from Weed and as well as nobody wants to Food mixed with Toxic substances ...

And that's the basic principles to propose for the «Steer the Future» that I want to mention in this topic :

**Purpose** is : strengthen Space – Time : to ensure the chances of survival

**Measures** are : principle of Nature : as Creator did manufacturing the Humans

**Model** is: divide according Selection: expansion for ability to develop diverse

**The decision rules for all** : must be Absolute : to get the purpose for striving.

Or it can be said as a formula :

*To get absolute success, let to follow the way of Nature*

*To get future like the desired , absolute must find out the Truth.*

I very believe when written these verses also because I always felt :

**Seems that like the Natural forces and the Paranormal Almighty has done so!**
