

## Theory of everything - There is absolutely nothing

Dear All,

I have been following the work of several of the prominent scientists to come up with a theory of everything. It seems that in this search of everything, one most important thing has not been considered. Who am I? I am in this universe as much as it is in I. What is I? I is sphere full of love. Imagination is more important than knowledge for all that we know is just an imagination. The language and the medium of this communication are also products of imagination. Reality as it seems can be termed as implementation of imagination. It is not mind over matter, it is only mind that matters. Relative reality is digital (duality), absolute reality is analog or continuous (singularity). I am the sum total of my thoughts, I is the calculator.

According to  $E=MC^2$ , mass gets converted to energy when it travels at the speed of light. Thoughts travel faster than light.  $S=BM^2$  (S-Soul, B-Body, M-Mind). Create a body with a thought, destroy the body with a thought and find the inner most self, Soul. We are not our bodies, we are not our minds, we are our inner most self (singularity). Singularity is absolute, everything else is relative. There is only one singularity in the relativistic universe and there is only singularity in the absolute universe and we are all in it.

If universe is the meaning of understanding of one's surroundings, then it is created with every birth and destroyed with every death. Universe is in a steady big bang state. Multi verse is just multiple interpretations made by bodies and minds of the conscience (soul or singularity). What one perceives of self (soul) is not the same as another, this is the multi verse with in the universe that we live in. The moment a thought arises the universe comes to existence. If one can still the mind to absoluteness then there will be absolutely nothing. This state of absoluteness is called Nirvana or immortality. One who knows thy self is immortal.

If life is the meaning of our relative existence on this planet then we were all dead even before we were born, so why fear death as we all have already experienced death. On this planet only one being, human, seems to care for Time dimension while all other species do not. If we only understand the perception of other beings dimensions sharing this planet would we appreciate the beauty of it all. There can be as many dimensions as we choose to have. There is no time until one chooses to count. Time is the space between all of us and in time we shall all be one (singularity). Everything gravitate towards singularity or Absolutely nothing gravitates everything, which implies there is no gravity in singularity. For every action there is equal and opposite reaction, there is also inaction at the point of their interaction. It is this inaction or singularity in everything that creates the actions (anti gravity) and the consequent reactions (gravity).

Death is to a person, as black hole is to a star. As light cannot escape singularity and time does not exist beyond singularity, so does a dead person cannot see light or does not have perception of time. Dark Matter / Dark Energy are only as dark as our thoughts. Lets weigh our thoughts in and we would have the total mass / energy of the universe. The moment when one stops thinking is when one sees the true light of love in the heart. Some think that universe is expanding, some think that universe is contracting, some think that universe is eternal, I know that universe is what we want it to be.

The theory of everything is that there is absolutely nothing, God is absolute state of mind, soul that is everything and nothing, we are relative states of mind, bodies that are something in between. Happiness and sorrow are relative states of mind, absolute state of mind is peaceful. There is only "one" singularity in the relativistic universe, there is only "Singularity" in the absolute universe and we are all in it. I am one of our kind and I is every one of all kinds. I am the verse and I is the Uni.

I am digital I is analog  
I am relative I is absolute  
I am Phi I is Pi  
I am 3-sphere of love I is n-sphere of love  
I am geometry of love I is singularity of love  
I am variant I is constant  
I am finite I is infinite  
I am present I is omnipresent  
I am potent I is omnipotent  
I am scient I is omniscient  
I am mortal I is immortal  
I am transcendental I is eternal  
I am matter I is ether  
I am observed I is the observer  
I am dual I is single  
I am mind and body I is the soul  
I am in the brain I is in the heart  
I am asleep I is awake  
I am a dream I is the dreamer  
I am in peace I is in love  
I am human I is god  
I am something I is nothing and everything  
I am virtual reality I is absolute truth

Truth is simple, accepting it is not.

Be in Love to Rest in Peace,

Sridattadev.
