

internet gateway

connect frogparking devices to the internet

options

Solar GPRS

for outdoor use

Mains Powered GPRS

used where solar is not an option

Mains Powered Ethernet or Wifi

does not require mobile data connection generally for indoor use

tech specs

wireless communication	433MHz, 866MHz, 868MHz, 915MHz (depending on region)
internet connectivity	GPRS for mobile data, Ethernet or Wifi (depending on model)
circuitry	lead-free circuit board with RoHS-standard components
operating temperature	-20°C to 80°C
software updates	sent wirelessly as required
power supply (mains powered)	110VAC - 240VAC
mounting	Solar: 1 x bandit strap Mains GPRS: 1 x masonry screwbolt Mains Ethernet/wifi: 1 x masonry screwbolt

overview
