Ethereum Transfers Data (ERC-20) powered by Flipside Crypto

Overview

Gain insights beyond price and volume metrics with Flipside's Ethereum Transfers data. Sourced directly from Ethereum nodes and parsed from blocks as they are mined, the data provides a record of all transfers for any ERC-20 token with a market on an exchange. Flipside's data includes both direct transfers between addresses and in-direct transfers resulting from contract execution, revealing usage patterns, concentrations of wealth, active vs. cold storage supply, and more.

Short Description

Ethereum Transfer data for all ERC-20 tokens.

Pricing and Duration

\$3,000 / month

6-month contract

Source

Ethereum nodes, parsed from Ethereum blocks as they are mined.

Database Schema

Column	Type	Description
timestamp	Datetime	Time each transfer cleared on the blockchain.
tx_hash	String	Unique identifier of the transaction.
from	String	The origin address of the transfer.
to	String	The destination address of the transfer.
name	String	Name of the asset.
symbol	String	Symbol of the asset (not unique).
contract_address	String	Unique identifier for the ERC-20 contract (code) executed to facilitate the transfer.

<i>value</i>	<i>Float</i>	<i>Amount of asset transferred.</i>
<i>usd_value</i>	<i>Float</i>	<i>Total USD equivalent transferred at the time of the transfer.</i>
<i>fee</i>	<i>Float</i>	<i>ETH denominated transfer fee.</i>
<i>usd_fee</i>	<i>Float</i>	<i>Total USD equivalent of the transfer fee.</i>

Github Developer Activity Data powered by Flipside Crypto

Overview

See what's under-the-hood of crypto projects who use Github for their development repository, and derive insights from the product life cycles of leading development communities. Flipside's data incorporates three primary data sets: organizations, their respective repositories, and high-level aggregate counts of event occurrences on those repositories.

Short Description

Github Developer Activity data covering organizations, their repositories, and high-level aggregate counts of event occurrences.

Pricing and Duration

\$1,000 / month
6-month contract
