

## Overview

FXhome provides the very best filmmaking and photography software to content creators and photographers all over the world. We are looking for an experienced full stack web developer to help us build and improve our online presence.

You will be part of every stage of development from concept to deployment. If you're passionate about user experience and enjoy crafting robust, scalable, and maintainable services, we would love to hear from you.

- Hours: 40hrs per week
- Salary: Competitive, depending on skills & experience
- Contract: Permanent
- Reporting to: CEO
- Location: Norwich, UK
- 25 days paid holiday a year plus all public holidays
- Flexible working policy, company pension and critical illness/death in service insurance
- Relocation package available

## Application details

Please supply a full C.V. detailing your work history and other relevant information to [sarah.boram@fxhome.com](mailto:sarah.boram@fxhome.com). Please specify which role you are applying for in your email.

Include at least one of the following:

- A link to your own website if you have one
- A link to any active GitHub (or other public code repository) accounts
- Sample code from a project you have worked on with a description of what you did

Your application must also include full contact details of two referees. Please clearly indicate if you are happy for them to be contacted before your interview.

## About us

We are a multi-talented crew of coders and creatives behind a range of software tools including HitFilm, Imerge Pro and Action Pro.

Everything we build is powered by a single belief – all artists should have access to great tools. As a result, 4+ million filmmakers now use our post-production software. Our community spans over 160 countries and all walks of life: award-winning directors, breakout YouTube stars, and budding filmmakers. It's something we're really proud of.

Throughout the years, we've worn many hats, helmets, and Jedi robes, but we'll never compromise our mission objective: give every artist the tools to make something cool.

## The Role

Your day to day work will involve, but is not limited to:

- Developing and maintaining existing and new web-based systems (both frontend and backend)
- Documenting technical solutions and writing system specifications
- Researching and building powerful and intuitive UIs and tools
- Providing technical advice and support on all things related to the web

## Skills and Experience
