## Brocade network advisor

10/08/2020 Contributors Download PDF of this page Cloud Insights uses Brocade Network Advisor data collector to acquire inventory and performance data from Brocade switches. Cloud Insights acquires the following inventory information from data collector brocade Network Advisor. For each asset type acquired by Cloud Insights, the most common terminology used for this asset is displayed. When viewing or troubleshooting this data collector, keep the following terminology in mind: Switch Switch Port Port Virtual Fabric, Physical Fabric Fabric Logical Switch Logical Switch Note: These are only common terminology mappings and may not represent all cases for this data collector. The following is required to configure this data collector: The Cloud Insights Acquisition Unit will initiate connections to TCP port 443 on the BNA server. The BNA server must be running version 14.2.1 or higher. Brocade Network Advisor Server IP Address User name and password for an administrator account Port requirements: HTTP/HTTPS 443 Field Description Brocade Network Advisor Server IP IP address of network advisor Server user name User Name for User User Name Password Administrator Password Field description Connection type HTTPS (default port 443) or HTTP (default port 80) Override connection port If blank, Use the default port in the Connection Type field, otherwise set the connection port to use password password for the Inventory Voting Interval switch (min) Default is 40 Report Access Gateway Check to include devices in Access Gateway mode Performance poll range (sec) Default is 1800 Some things to try if you encounter problems with this data collector : Problem: Try this: Receive a message that more than 1 node is logged into the Access Gateway port or the data collector fails to detect the Access Gateway device. Make sure that the NPV is working properly and that all

connected WWNs are expected. Do not directly obtain the NPV. Instead, the acquisition of core fabric switch will collect NPV device data. You no longer need to open an IBM-supported case to request them. If you need to upgrade the FOS firmware, browse to IBM Fix Central and select the applicable product. You are encouraged to be right. Enter the machine type and serial number of your device with the current warranty or maintenance coverage. If you need an update for IBM Network Advisor, you will not be prompted to enter a serial number, but the ID you are using on must be associated with your current software maintenance software maintenance After checking for eligibility, you will be provided with a link to a download help page on broadcom.com, where you can download updates. The link is valid only for your current session. You can browse the page and select the version you need. The page is adapted for IBM, and contains only firmware versions qualified by IBM, which you can find documented here for FOS 9, here for FOS 8 and here for FOS 7, and the latest Network Advisor version. Broadcom only publishes the latest versions of FOS firmware, as per the software releases and support document policy on their Brocade Product End of Life page. This document is updated periodically as new versions of FOS are released and older versions reach the end of life. If you need an older VERSION of FOS that is not on the download assistance page, please open an IBM-supported case. We will work with Broadcom to give it to you. Note: To comply with export control rules, Broadcom must learn your address. You will be prompted to provide it by filling out a form the first time you browse to the download assistance page. You are not required to establish an ID and password on broadcom.com. You simply need to associate a physical address with the email address you provide when using the site to access downloads, and it must be an email address for the work. The information you provide is used only for export compliance. If you don't visit the site again for 90 days, you may be prompted to fill out the form again. {{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STQPPK,label:SAN512B-6 Director (8961-F08)},Component:,Platform:{{code:PF025,label:Independent Platform}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STQPLH,label:SAN256B-6 Director (8961-F04)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:ST8M4B,label:SAN24B-6 (8960-F24)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions Edition :.Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STMN38,label:SAN42B-R (2498-R42)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STNNAB,label:SAN96B-5 Switch (2498-F96-N96)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STNNL8,label:SAN24B-5 Switch (2498-F24)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STMSAD,label:SAN768B-2 Fabric Backbone (2499-816)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STMSBR,label:SAN384B-2 Fabric Backbone (2499-416)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STMKQC,label:SAN768B Fabric Backbone (2499-384)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STMKPN,label:SAN384B Fabric Backbone (2499-192)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version:All Versions,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STMKS2,label:SAN24B-4 Switch (2498-B24)},Component:,Platform:{{code:PF025,label:Platform Independent}},Version :Alla versioner,Edition:,Line of Business:{code:,label:}},{{Business Unit:{code:BU054,label:Systems wVTPS},Product:{code:STMKTF,label:SAN06B-R (2498-R06)},Komponent:,Plattform:{{code:PF025,label:Platform Independent}},Version:Alla versioner,Edition:,Line of Business:{code:,label:}}}
