## WHAT IS *polylac* ?

Polylac is an ecological multi-layered decorative panel, with the highest scratch and heat resistance on the market. It also has the highest gloss level in the industry with a mirror like reflection.

Polylac is made by pressing a high-density decorative paper to MDF. A specially developed bio-optimised transparent PET film is then laminated on the surface to protect it from external factors.

*polylac*

UHG Panels are typically PVC or PET laminated on E-1 Type MDF. High Gloss panels are manufactured to meet internationally recognized quality standards and will suit any residential or commercial project where a ripple free, easy to maintain high gloss finish is desired.

- Ultra high gloss finish on both sides
- High scratch resistance
- Laminated on PUR Clean Room Line to ensure smooth face
- Protective film on surface for machining

Vision Acrylic panels are made with Senosan® AM1800TopX high gloss lacquered acrylic films. With their unmistakable surface and depth effect, they offer a gloss effect like no other material. They can be distinguished by excellent scratch resistance, UV resistance and environment friendly features. All products are exactly matched as required to their target group of furniture manufacturers, suppliers, laminators and designers. With the new quality of Vision Acrylic senosan® AM1800TopX, a new film with enormous scratch resistance has been developed. The benefits of Vision Acrylic senosan® AM1800TopX panels are:

- Excellent scratch resistance (scour resistant)
- High chemical and stain resistance
- Protective film on surface for machining
- No polishing of the surface
- Industry leading UV resistance
- Low Maintenance
- Processed in Clean Room Environment

SuperMatte is the latest product release from Gizir, showing their endless pursuit to offer products in line with newest trends in the market. It is processed using a state of the art PUR line in a clean room environment. It is laid up on a refined and calibrated MDF core to ensure a smooth surface. The "Soft Touch" PVC/PET plastic is silky smooth to the touch and is also Finger Print resistant. SuperMatte by Gizir offers a very durable and scratch resistant panel, at one of the best price points in the Matte finish arena.

- Finger print resistant
- Soft Touch finish

FENIX NTM<sup>®</sup> has introduced new technology to HPL resulting in one of the most innovative products in modern surfaces. A matte finish with an ultra-soft feel. It has anti-bacterial properties, is resistant to finger prints, solvents and household cleaners but one of its most innovative attributes is that it can heal itself of minor scratches. Due to the nanotechnology, when heat is applied the surface will bond with itself and remove minor scratches.
