Transitional Care Center

Overview

GEM Transitional Care Center in Pasadena is a 75-bed skilled nursing facility specializing in short-term therapy as well as long-term care.

Our highly qualified staff makes sure that our residents are cared for in a safe and pleasant environment. They treat their patients like family.

Upon admission, a team of professionals develops a care plan tailored to the needs of you or your loved one. Team members coordinate therapies, social activities, and diets for each resident to ensure a full and comfortable lifestyle. We aim to meet the physical, emotional and social needs of our residents. We help residents recover with dignity while receiving compassionate care and personal attention.

We understand that the transition to a skilled nursing facility after surgery, injury or serious illness can be challenging. At GEM, we strive to ease the process by providing an environment where residents and guests are informed about their course of care and feel comfortable that they are in good hands. From our well-appointed guest rooms to peaceful common areas and lounges, to our delicious dining services, we strive to make GEM Transitional Care Center your home away from home.

Services

Nursing Services

Our highly skilled nurses provide quality care around the clock. Their skills are only half the picture. Each nurse is a gentle and caring person, with genuine concern for each resident. They can provide IV therapy, wound care, catheter care, medication management, bowel and bladder programs, diabetes management, and restorative care.

Rehabilitation Services

Each of our residents comes to us with very different and specific rehab needs. Our entire rehabilitation team (PT, ST, OT) is committed to creating individualized therapy programs that directly answer those specific needs. We work with each resident to achieve his or her maximum potential of independence and ability.

Sub-Acute Care

Our sub-acute care is for those residents who are medically fragile and require additional attention. We seek to maximize the quality of life for our sub-acute care population and offer them specialized restorative services. Our goal is to maintain or improve each resident's highest functional ability.

Dementia Care

When someone is suffering from the progressive stages of memory loss, they will need additional support and assistance. Our dedicated team of professionals offers the care needed to help each resident in each unique case.

Activities & Dining Program

We provide a monthly activity calendar to each resident to keep them informed of upcoming events. Friends and family are always welcome to visit and attend our special events. GEM residents enjoy appetizing, nutritious meals, which are prepared under the supervision of a Registered Dietitian. Those residents not on a therapeutic diet can choose from a delicious range of dishes that rotate daily or they can order from the Always Available menu.

Social Services

The Social Services Department provides essential information, manages requests and concerns, coordinates appointments, maintains contact and open communication between the facility, families and the residents, and helps in care planning and discharge planning for each resident.
