NEWSLETTER MAY 2020

You are the light of the world. A city on a hill cannot be hidden. Neither do people light a lamp and put it under a bowl. Instead, they put it on its stand, and it gives light to everyone in the house. In the same way, let your light shine before men, that they may see your good deeds and praise your Father in heaven.

MAY 2020 IIMPORTANT DAYS

1 MAY DAY	INTERNATIONAL LABOUR DAY OR MAY
1 MAY	MAHARASHTRA DAY

They are more likely to be optimistic or clinically depressed.

But they're pretty healthy in general

May babies are among the tiniest

They feel pretty lucky

They like to stay up late

Opposites attract

Coronavirus (COVID-19) disease pandemic

The world is currently experiencing a pandemic of an infectious disease called coronavirus disease 2019, or COVID-19. COVID-19 is caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) and is part of a large family of coronaviruses (CoV). Coronaviruses are transmitted from animals to people, with this particular strain of coronavirus thought to have originated from a seafood market in the city of Wuhan in China in late December of 2019. Symptoms of COVID-19 resemble that of the common cold, with those infected often experiencing fever, coughing, and shortness of breath. However, infection can lead to pneumonia, multi-organ failure, severe acute respiratory syndrome, and even death, in more severe cases. The elderly and those with preexisting chronic health conditions have accounted for the majority of deaths from COVID-19.

As of May 10, 2020, there had been cases of the disease in around 210 countries or territories across 6 continents. [China](#) was initially the country most impacted by the disease, however the United States, [Spain](#), [Italy](#), [the United Kingdom](#), and [France](#) now have the most cases worldwide. As of this time, there had been over 4.1 million [cases of COVID-19 worldwide](#), with over 1.3 million of these cases found in the United States. Many countries around the world are now enforcing lockdowns to try to slow the spread of the disease. Such measures and restrictions vary from country to country but usually involve closing schools, canceling public events, closing borders, and encouraging people to work from home. [The United States](#) now has the highest number of COVID-19 cases and deaths of any country worldwide. [Every U.S. state has reported cases of COVID-19](#), with the state of New York accounting for the vast majority of cases. [New York State](#) now has more COVID-19 cases than any single country worldwide. [Survey data shows that concern about the COVID-19 pandemic](#) has increased in the United States, with 32 percent of U.S. adults in January stating they were very concerned about the outbreak and this number rising to 58 percent as of April 19. It is estimated that over 90 percent of the population of the United States is now under a stay-at-home order, with many states [closing schools](#), restaurants and other entertainment venues, canceling public events, and encouraging social distancing. The United States government has been criticized for initially downplaying the seriousness of the pandemic and for its slow response as cases began to rise in the U.S. [A recent survey from Statista](#) has found that U.S. adults are less likely to be satisfied with their national government's response to the COVID-19 pandemic than their counterparts in the United Kingdom or Germany.

PLEASE TAKE PRECAUTION AND BE SAFE GOD BLESS
