## *LIVING WITH DEMENTIA, CAN HUMOR HELP?*

*LAUGHING OURSELVES HEALTHY: CARE-PARTNER HUMOR AND RESILIENCE  
IN THE FACE OF DEMENTIA*

Participants of this workshop may be surprised by the evidence-based link between laughter, coping and resilience. We'll explore research about laughter, positive expression, and their effects on cognition and health. We'll place an emphasis on resources and strategies to support healthy humor through the progression of cognitive change. Brian LeBlanc, an international advocate living with dementia, and Maureen Rulison, his partner in care and in life, will share how humor has helped maintain the quality of their lives and relationships.

2.0 Contact Hours Available
