

January 10, 2021

Dear Residents, Family Members, and Staff:

The Department of Public Health has advised all nursing facilities in Massachusetts to make renovations if necessary to eliminate rooms that have capacity of more than two Residents per room. As you may be aware, Presentation has four 3-bedded rooms. To comply with the state mandate, we provided the State with a Determination of Need and a multi-phased construction plan to change the existing four 3-bedded rooms into six two bedded rooms.

To accomplish this project, it is also necessary to renovate existing utility and oxygen storage rooms. We will need to temporarily relocate a few Residents who presently reside in two of our 2-bedded rooms.

That phase of the construction will begin later this week.

The entire project is estimated to take up to three months. We will be contacting Residents and their Responsible Persons directly on who will require room changes.

We hope to make these renovations with as little disruption as possible. We are pleased to comply with the directive from the Department of Public Health as we are in agreement that such changes will provide for a better living environment for all our Residents.

Should you have any questions or concerns, please contact me directly at 617-782-8113.

Respectfully,

Rob Grady, Administrator
