

Activities

Activities are client based and individualized to meet client's developmental needs. Residents are provided the opportunity to participate in a full calendar of recreational and social events such as crafts, games, music and religious programs. Activities promote a resident's self-esteem and stimulates interpersonal relationships.

Program Services

Whether a resident is admitted for short or long-term care, it signifies a major change in their daily routine. **Golden State Care Center's** social service staff is here to help ease the period of adjustment for both residents and their families.

A Difficult Decision Made Easier

When you choose **Golden State Care Center** you or a loved one receives individualized 24-hour intermediate nursing care. At **Golden State Care Center** you will discover professional services, compassionate staff and amenities that make a difference.

Call today to speak with our Administrator about the admission process and get answers to any questions you may have. We'd also be happy to schedule a personalized tour of our facility.

Golden State Care Center

Golden State Care Center has served the community of Baldwin Park since 1991, and we pride ourselves on our established reputation of individualized, quality care.

At Golden State Care Center, we specialize in services for those with intellectual disabilities. Our 155-bed facility offers healthcare and daily living programs to meet the needs of residents with a wide range of intellectual and physical disabilities, including cerebral palsy, autism, dementia, downs syndrome, and blindness. For over 25 years, Golden State Care Center has worked closely with the San Gabriel/Pomona Regional Center (SG/PRC) as our placement agency. The primary function of SG/PRC is to coordinate quality services and care for adults with intellectual disabilities. We are honored to serve those they place in our care.

At Golden State Care Center, our mission is to provide residents with health and active treatment services using the least restrictive model of treatment. We seek to provide each resident with as many opportunities as possible to increase their independence, using a person centered model of care and services.

The Healthcare Team

Our experienced rehabilitation team is committed to providing outstanding results and excellent quality of care. Patients are empowered through individualized programs to reach goals of increased independence and ability.

Therapy Services

Physical Therapy

Our physical therapy team works toward specific goals of achieving the patient's highest functional level of independence. Physical therapy focuses on identification and mobility of individuals with physical limitations and pain, as well as future injury prevention. Following evaluation, our experienced physical therapists develop an individualized treatment program. The goal is to achieve safety in a variety of areas.

Occupational Therapy

Occupational therapy assists our patients in adapting to their social and physical environment by teaching tasks essential for daily living. Our occupational therapist may work with residents who have debilitating arthritic conditions or those with difficulty bathing, dressing, grooming & hygiene, and other activities of daily living. They assist patients with impaired vision and/or hearing to function well in their environment.

Speech Therapy

Our speech therapists provide a range of interventions to assess and help restore abilities in the areas of communication, swallowing and cognition. Treatment programs are designed to help residents affected by stroke, brain injury, dementia, and other neurological disorders. Our professionals also work with patients suffering from hearing impairment, respiratory illnesses, and complex medical conditions.
