

# LOUISVILLE EAST — POST ACUTE —

Name: James M.

Diagnoses: Left Ankle Fracture,  
Coronary Artery Bypass

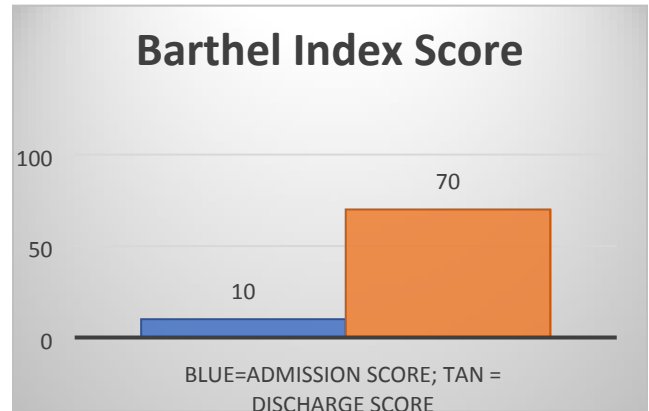

Physician(s): Dr. Grewal

Dates of Stay: 12/24/18-1/18/19

In His own Words: “The rehab staff were great-especially Sue and Abu who worked so hard with me to improve my strength and standing. I know that I have cardiac rehab planned for 12 weeks with the hospital outpatient therapy department, but this has definitely prepared me to go home.” He received Physical and Occupational Therapy in preparation to

return home. His Activities of Daily Living Outcomes are:

This assessment indicates that he improved from completing activities of daily living with 10% independence improving to 70% independent at discharge (a 60% increase over the course of a month). Although his orders were to remain non-weight bearing on his left leg until it healed, he did improve and was able to transfer and step short distances with use of rolling walker and increased strength. We are proud to see James return home!
