

Rock Creek CARE CENTER

Taking care of wounds requires special medical attention.

Rock Creek's wound care team is led by surgeon Dr. David M. Skeehan, DO. Dr. Skeehan personally assesses each patient and implements a custom treatment plan to heal chronic, non-healing wounds.

Our wound care team utilizes the most modern industry procedures for wound treatment. We understand that every wound must be approached uniquely depending on the severity, condition, and underlying diagnosis.

Personalized Wound Care

Personalized Care

The goal at Rock Creek Care Center is to promote healing and prevent recurrence. We care for wounds gently and respectfully, developing a custom treatment plan and monitoring the site for signs of infection. Our personalized approach has lead Rock Creek Care Center to be recognized for excellence in the community for skin and wound care.

Specialized care for serious wounds such as:

- Diabetic and pressure ulcers
- Surgical wounds
- Traumatic wounds
- Persistent skin irritations
- Venous insufficiency
- Neuropathic ulcers
- Vasculitis and other inflammatory ulcers
- Other chronic, non-healing wounds

Understanding Your Insurance

No matter what type of medical insurance you have, our financial experts will help you understand what your plan benefits include.
