

Select in Representations “ Master” ,
Click right, and click on “New”
You will see a new representation “ View1”
Next is click on “ Save”

Next is very simple.

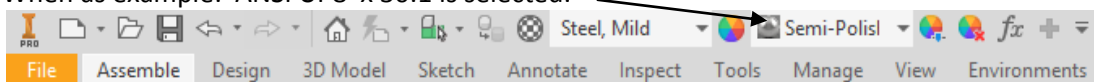

Now you select for example the First beam “ANSI UP8 x 30:1,

And select a color in “ Appearance “

When nothing is selected.

When as example: ANSI UP8 x 30:1 is selected.

Now just click on the black arrow next to “ steel mild “, it will open and you can pick any color you want. Save it and you are done. When you click on representation “ master “ you will see nothing is changed.
