

Firmware EOL Notice

Article ID: GV3-21-10-05

Release Date: 05/10/2021

As technology and business evolve, there will be cases where older products no longer meet market requirements and eventually reach their End-of-Life (EOL).

As for the EOL products, GeoVision will no longer release updates and patches for their firmware, and these old firmware downloads will not be available on our website any more.

GeoVision has continuously enhanced our products with new features and technologies to protect against most recent threats, so there are always newer and more better replacements of these products available.

Should you have special requirements for upgrading to the EOL firmware, please contact our support team: support@geovision.com.tw
