WORK SMARTER. NOT HARDER.

Engineered with the experts in mind, the Treysta™ tub and shower valve is Gerber’s most innovative valve yet. Powered by more than 85 years of Gerber performance, Treysta provides flexibility based on the specific requirements of each installation. From the intuitive open and close stops for easy maintenance, to easy installation and pressure-testing features, Treysta saves both time and money. Fully compatible with Gerber tub & shower trim kits*, Treysta helps you get the job done quickly and confidently – affording you the peace of mind backed by Gerber reliability.

FEATURES AND BENEFITS

- **Revolutionary Vertical Inlets** – Treysta’s vertical inlets allow for maximum flexibility in the wall, and can install next to a stud in PEX applications without requiring re-framing
- **Easy Pressure Testing Capability** – Treysta features an innovative pressure test cap to make the process of air and water pressure testing easier to complete
- **Easy Installation and Access** – With an easy-access mounting system and integrated depth indexing features on the plaster guard, Treysta is engineered to install smoothly and quickly
- **Flexible and Adaptable for Different Environments** – Treysta has a solution for “with” and “without” stops, and accommodates back-to-back installations and reversed hot and cold inlets, as well as IPS / sweat, Crimp PEX and Cold Expansion PEX
- **Secure and Level Mounting** – The body of the valve features integrated mounting holes for a firm and secure hold, and the flat plane of the plaster guard allows it to install level with the wall
- **Innovative Common Platform** – Treysta uses a common platform of pressure balance cartridge for all configurations, meaning that a single cartridge fits in all valve bodies
- **Fully Compatible with Gerber Viper and Maxwell Trim Kits with TC suffix** – These trim kits have been updated to include the Treysta pressure balance cartridge, which will ultimately minimize cartridge damage during rough-in installation

* Compatible with trim kits that ship with the Treysta ceramic disc cartridge and are identified with TC item number suffix.
Valve body can be rotated 180 degrees for top-down installations with a few simple steps. Requires rotation of retention plate and plaster guard.

The innovative test plug can test mixed pressure, or isolate an inlet to test pressure or for system cross flow.

Includes pressure test cap for air or water pressure testing.

Plaster guard features a no-tool clip design for fast removal while providing a secure hold.

Two attachment points for thin-wall installations.

Unique shaped plaster guard protects body, provides surface to use level and ease of tile work.

Finished wall depth indicators in 1/4" increments for easy depth indexing.

Top and side surfaces are flat to simplify tile cutting and help ensure level installation.

Quarter turn stops easily open and close using a flat head screwdriver.

Stops secured with durable, threaded brass nut easily secured with standard socket.

Integral mounting holes for fast, secure mounting.
