

SMALL GROUP HOST

How do I become a Host?

You can become a Host by simply starting your group anytime, anyplace. Let us know you are hosting by visiting gfconline.com/host.

What does it mean to be a Host?

If you take the word HOST and use it as an acronym this is what being a HOST would look like.

- H (Have a heart for people)
- O (Open your home or place to meet)
- S (Serve a snack)
- T (Turn on a computer)

Where do I go for help?

If at any point you need assistance please email our small group team at smallgroups@gfconline.com. We are happy to provide any assistance you may need.

Where do I find people for my group?

We recommend that you invite those you have relationship with regardless of their faith. Whether they're people you know through church, work, school, youth athletics, etc. Simply invite them to "pull up a chair" and be a part of your group.

What if I get asked a question I can't answer?

It's okay to not have all the answers. You may want to encourage the group to collectively research the answer and touch base the following week or you can email your questions to smallgroups@gfconline.com.

Where should we meet?

We suggest that you meet somewhere central that is easy for all group members. Some popular locations would be places like your home, office, restaurant, library, coffee shops, etc. Any place that is relatively quiet and has a good atmosphere will serve as a great place for discussion.

Where do I find content?

You can find the content on RightNow Media at gfconline.com/resources. This can be accessed on your computer, tablet or phone.

What happens after the video is finished?

The HOST will "facilitate" the conversation by going through the discussion questions provided after the video. There is a "take away" at the end of the questions that will help you draw the group to a close.

Can I use the Right Now Media App to view the video?

The Right Now Media app is limited to their posted content. To access Grace Family Church's Weekend Message Series, you will need to use your web browser on your computer, tablet or phone.

How to I connect my devices to a Television?
