### [Bannon : ]

Welcome back to War Room Pandemic. This is episode 306, 29th of July. Year of our Lord, 2020. So much going on today day. Want to put up on the screen right now.

Financial Times of London has a big story about, guess what? The Chinese bonds from the 1930's, that the The American Bond Foundation Jonah Bianco and we're gonna have him tomorrow in-depth interview about the Financial Times. A very positive Article in the Financial Times. We're winning, victories all the time and actually a professor at Duke University sitting there saying that these bonds are actually legitimate and that will be an entire discussion with the New Federal State of China. The Whistleblower Movement you seeing this momentum building of a free people throughout the world trying to hold the Chinese Communist Party Accountable.

In this segment we've got one of the great other Heroes, Lu De. He is a, he is a broadcaster that also left China and started out in Vegas is now on the East Coast but a fantastic show everyday. omments a lot on the war room in his commentary in his show and just another hero, these Patriots. What we're going to try to do is introduce you over the summer and into the fall of all these Patriots that have left China have come to the United States and other countries. That are now abound together in The Whistleblower movement. Other movements you see in GTV, GNews want to thank everybody there for doing live broadcast in Mandarin and also subtitles.

But Lu De, Thank you for doing the show

### [Lu De : ]

You're welcome, thank you

### [Bannon : ]

Lu De is so important because, the very first time Dr. Yan...so Dr. Yan we gonna get to you, turn to you now and get back to we were talking about yesterday and I want to say David Brat and the guys at Liberty University. The coverage on this thing of the last couple days, it was explosive and for our audience they should understand in a millions of views one of the biggest thing was your interview.

In fact the Newsmax team is quite interesting. Newsmax normally takes the first hour of the show and that's where it gets all the b-roll. Last night they reverse it, they put the second hour of the show up first, and the reason the second out of the show was up was your interview. The people yeah, people are so amazing.

Here's what I want to get to today...and you gonna be back in studio tomorrow. I'll actually be interviewing you from the from the vessel and we will get more into hydroxy, but one thing you told me, you know after you had the interview with Lu De and you came to the United States is “Why people in the United States are not focus on what the real problem is here.” And “the problem is this came from the CCP; this came from this lab in Wuhan.”

So, I want to go back to, walk us through in detail why you're making this claim, given your position that this came from Wuhan and every other aspect the people are talking about is some sort of spin or to take your eye off the ball.

#### [Dr. Yan : ]

Okay, actually I came to you as people still not realize about what this situation actually based in China, and origin from CCP regime is because first very importantly from the beginning of this pandemic. CCP government is trying their best to recruit even scientific field and like the organization as WHO to cover up all these things and then they make up lot of lies to mislead people who get into this field and they chase their false information to the other side.

So these things make people cannot find the real information about this and actually this virus is not originated from nature not from the bat by itself. It is just a virus based on a bat virus which is discovered and owned by Chinese Communist Party, the military lab.

#### [Bannon : ]

Okay hang on for one second. When you say it's not from nature and It is not from a bat virus. That means it was made somehow. Walk us through, what is your evidence for that and how can an American audience understand that. Because it's being spun here, by the mainstream media that Batwoman they show her all the time, and this bat..walk us through, what do you mean it's not a bat virus and it's not natural, It's man-made.

**[Dr. Yan: ]**

Okay, so this is not a bat virus that directly jump into human and this is a virus based on a bat virus, which is discovered by PLA and owned by them, and going through the engineering modify in a lab. Also going through a series of passage in the animals to make it focus on human so that's why we can say it's very powerful for human being now.

So what we can say is there are very solid evidence. Similarly, I can tell our audiences that it's like we check something based on our fingerprint and for the virus a fingerprint is their genome so we can see all this kind of evidence from their genome. That's also why in the beginning of the outbreak. China government try to postpone the publish of the genome sequence and even change it.

Because they initially put some wrong genome sequence to NIH database, and these are the things that later revealed by me through Mr. LuDe's Youtube, and then quickly, the next day submit batwoman Shi Zhengli's Nature paper, which was published on 3rd February about RaTG13 virus, and then the CCP control and influence a whole scientific field and WHO. These people they start to tell people this is the real origin and mislead, drive the attention from the real origin of the virus to the RaTG13 and build something based on that.

**[Bannon: ]**

Okay, You're saying I want to go back you're saying they originally did not or inadvertently they did put up the regular the genome sequence and then took it down or they put up a false one.

Because you called it out, they put up the real one.

**[Dr. Yan: ]**

The story is like this, because on 12th January this year. The first time people know the sequence because the China Government and the other scientists upload the first sequence isolated from the patient in Wuhan to NIH Genbank database.

And at that time my husband was one of established virologist in Coronavirus field and also WHO expert. He did the check and then he told me that this is wrong genome sequence.

Which means...

**[Bannon: ]**

On 12 January you were told on, 12 January. This is the wrong genome sequence.

**[Dr. Yan: ]**

Yes, my husband told me that Because he did the research and he's also curious about the genome sequence.

**[Bannon: ]**

He's also at the lab in Hong Kong, a very prominent virologist.

**[Dr. Yan: ]**

Exactly, in the same WHO reference lab who is senior to me and also the best help for Professor Malik Peris and Leo Poon.

**[Bannon: ]**

Did you think that that was pretty shocking that when you talk to your husband and other sciences, that they would not put up the right, the correct genome sequence, that they would not give that to NIH and put it into the database.

**[Dr. Yan: ]**

Yeah that's something very, I mean surprising, because we now saw the genome sequence should be wrong. It's like a fingerprint. You get it, you uploaded. Nothing can be wrong like this.

Especially, my husband clearly told me that this is something very weird that wrong things happen.

**[Bannon: ]**

And I want to make sure there American audience understands this.

You're saying that would be "That couldn't have been a mistake."

**[Dr. Yan: ]**  
It cannot be!

**[Bannon: ]**  
Why could it not be?

Why would it have to be done deliberately?

**[Dr. Yan: ]**  
So for the real motive I think you have to ask the government. Those people who controls genome sequence and all the things.

But for us, we can understand. at 12th January, they upload the wrong one which include some wrong information inside. Based on that the virologist, the scientist can not trace it back to the ZhouShan Bat virus. Which I mean, the backbone for the SARS-COV-2 owned by the PLA.

But one day later, 13th January. Please notice that is the day that the first overseas cases happened in Thailand. So that means people from overseas can also get a virus sample and they also can isolate it and also people will see the problem between the wrong genomes sequence and real genome sequence.

**[Bannon: ]**  
You say, they will be caught in a lie, That this would be so shown

**[Dr. Yan: ]**  
It can be, they know that, because they didn't imagine that there overseas Patient, came out so quickly. And there no even interval for this a mutant to happen. So once the overseas scientist gather Patients have a big chance to isolate the virus out.

That's why on 14th January we see the previous wrong genome sequence was replaced from the NIH database. That is the version 2 and they clearly mention that the version 1 was replaced which is very rare happened in genbank database

And from that day, If you compare it, you can see among all the known genome sequence in the database and Zhoushan bat Coronavirus ZC-45 and ZXC-21. They are the one most close to the SARS-CoV-2.

**[Bannon: ]**

Is the 14 January they put into the NIH?

Is that the correct Genome sequence? Or still not?

**[Dr. Yan: ]**

That's the one kind of cracked because 3 days later. Again they upload the third version which is little bit longer than previous one, and I did check for some important protein.

I have checked between the 14th one and the 17th one. I see it's kind of okay, but also at that time I didn't finish all the comparison. So there maybe some other wrong information, important things.

**[Bannon: ]**

Are you also saying that the reason that's...One of the reasons this was changed is because your interviews.

You started going on Lude's show, the YouTube show and start to talk about this. Was that part of the reason you think that they tried to understand? that there are going to be outage, they made the change?

**[Dr. Yan: ]**

No, this is before the 17th, before I got the...deliver the message to Lude's show. But what happen is that we did that show on 19th January, Beijing's time at night and after that Beijing time 20th January. Professor Shi Zhengli, the Bat Woman's paper about RaTG13 is submitted to Nature and also this one is published at the same day. On the same topic on Nature with Professor Zhang Yongzheng , who was the one first published the genome sequence of the SARS-CoV-2 and said this is mostly close to Zhoushan bat virus.

And note Professor Zhang Yongzheng got punished by this paper and his P3 lab was shutdown.

**[Bannon: ]**

Are you asserting that this is part of a cover-up by the CCP and by in conjunction with either the Reference Lab in Hong Kong and others like WHO etc. to cover up their tracks to cover-up their actual complicity in this?

**[Dr . Yan: ]**

Yeah, cover-up and even more than that because for the experienced scientist and they have the basic knowledge. You come back to see this virus genome, is like the fingerprint as I said, and it's not difficult for them to realize the problem happened inside. It's basically like the virus becomes the enhanced SARS virus with SARS functional part and with some other lethal part. And this thing is like the cow has a deer's head and has some rabbit's ear and also have the monkey's hand.

I mean, please tell me how it comes from nature?

**[Bannon: ]**

And that is because, you're saying it's not in nature and that's because this is trying to be weapon...was this a gain-of-function, another words, were they doing experiments to try to come up with solutions for SARS in vaccines and therapeutics.

Or is this a weaponization program to try to build something that could actually be used?

**[Dr . Yan: ]**

I'm the one who's been working on the vaccine development for several years. I can tell you this is definitely not for vaccine, for solution of the SARS virus. Briefly, this is like if you want to make a toy gun for the kids and you should remove the bullet, you should remove the harmful part.

But in this version, is like you said "Okay I'm now making toy gun." and then I put some knife, sharp knife on that, make some missile on that then I gave it to kids and said this is your toy.

**[Bannon: ]**

So you're saying that there's no....

There is zero chance this is came from nature and that this was a very well thought through program.

**[Dr . Yan: ]**

Even based on common sense, yes.

**[Bannon: ]**

Okay, our guest Dr. Yan. She's going to actually be back in the war room tomorrow. Really want to thank her. She's in Washington for a couple of days and giving a host of leading discussions, giving interviews etc. It was a star turn at the conference for two days. Because I think, people, It's the complexity of this. That that that, you know, it's tough to get your hands around.

Here, so much spin in the media. One thing it's very evident I think it's you're going to drive this in this pivot is that there has been very little investigative reporting on this. The West is just want to turn a blind eye to all this. All the big apparatus want to turn a blind eye.

But we do have and I want to come back, Jack, to talk about...

Let's we continue the interview with Dr. Yan. People are changing. In the Wall Street Journal there're different articles. You're starting to see people from from organizations that have not traditionally been Anti-ccp. But it really kind of been if not in business with them. You know, going along and kind of this engagement process. And now I think because the evidence starting to mount. People are starting to come back.

**[Jack: ]**

Well Steve and I were talking at the break that I think we've just lost our fanbase to Dr. Yan. This is one of hundreds during the show.

“Dr. Scarlett Yan, thank you so much for your bravery and courage. Thank you for trying to save the world at the expense of your own safety.”

**“Dr. Yan is my hero! Dr. Yan is a superhero!”**

**“Dr. Yan is a hero for the whole world. Salute to Dr. Yan!”**

“It’s one after another and it’s really true people!”

“This is what courage looks like!”

**“She's sitting right next to me!”**

and we really hand salute to a great patriot for the world.

**[Bannon: ]**

Pull up also the Wall Street Journal today, to really support Dr. Yan. Dr. Yan, you’ve got the article in front of you. I know you say is not totally technically correct, but the important thing here is the Atlantic Council.

The guy is not a, let’s say, not a fan of the anti-CCP movement, but even the mainstream media is starting to come to and it's because I think of what you guys are doing, to bring this word to the West that one of the reasons people should, should think about this even people don't totally agree with the show...

One of the great misses really here was about this virus in the summer, remember even Fauci and Birx, and in the mainstream media were all talking about the second wave, that it would all dissipate in the summer, etc. This thing has been, we’re still in a surge of a first wave, and why is Peter Navarro, Dr. Peter Navarro continuing to say and I support. It's impervious to heat and humidity. It's impervious to heat and humidity.

Well nobody would have thought that at the beginning. People actually argued the exact opposite. It was going to go away in the summer. That's why you could do these openings at the state. Right, and then you had to worry about the second wave. We’re still in a burning, you know, in the burning inferno of a first wave.

Why, everybody got it wrong about this?

Not, but not if you listen to Dr. Yan, because Dr. Yan says you're thinking of it the wrong way. This did not come just from a bat. It had to be manipulated and like she said this is, this is a virus that's got a head of a dragon, the arms of a monkey, and the feet of a whale, right. It’s a composite part.

**[Dr. Yan: ]**

Exactly!

**[Bannon: ]**

You say it's like giving a kid a toy gun, but the toy guns get an arrow on it, a rocket, a missile and a big round of a 45.

Dr. Yan, how did you get to Lu De? Because Lu De is the very first individual to give you a voice in a platform that we all think how did you get to Lu De?

and why did you decide to go to a guy who's streaming a live show of commentary about CCP everyday?

**[Dr. Yan: ]**

Because I have listened to Mr. Miles Guo and Mr. Lu De's show for a while, and especially since the Hong Kong moments. You know that China government tried to suppress all those kind of free speech about the truth. So I had to find out a reliable way to help me and support me to understand the situation. Because I see the live broadcast in Hong Kong street and I see what is happening, but then the other side from TV, from website are controlled by CCP government.

We cannot see the truth. Everything is twisted in the wrong perspective, so I really need some true voice to support me to support my understanding and their show actually made me understand more about CCP's darkness, and at that time when I started to do the investigation and realized the truth behind the COVID-19 and also I didn't see the response from WHO. I see China government don't want people to know the truth.

So the key point is I had to find a reliable way to deliver the urgent message to people, to the world. And at that time, you cannot trust government. You cannot trust the main (stream) media, you cannot trust anything else, but I trust Lu De (who) is the only one media. Because he's so strong on the justice side and keeps revealing the truth to people, delivering the right message. So I believe him.

I think he can deliver the message to people because he will understand what happened and he will help it go to the public. So yeah.

**[Bannon: ]**

And this was around, this was building up and basically on the 19th of January. The 19th of January which would be, correct me if I'm wrong, would have been around Lunar New Year. Lunar New Year should have been taking place. I know it was cancelled.

So by January 19th, you knew that this was being suppressed by the authorities by the University-of-Hong-Kong-based lab by the World Health Organization and certainly by the Beijing CDC. The people that should have known better this has been suppressed and so you thought at the time I've got to get this message out to the World, out to Lude.

Weren't you afraid by going on the show and doing the show and giving information to Lude that your life could be in jeopardy?

**[Dr. Yan: ]**

Yeah I know the moment I know. When I decide to deliver this message to Mr. Lude.

I know my life is in danger, life-threatening and at any moment even I just try to contact him they may just catch me because you know we have the huge surveillance all over the world under CCP even so the only thing I'm worried about is whether I can deliver the message before I get disappeared by CCP government.

And luckily, I did it! And I was very scared, yes

So the day actually before his broadcast, (which is) several hours before 19th January, Beijing time in the afternoon. There was a globally technique problem happened on WhatsApp. At that time I cannot send any message and picture, so I was in the library, in the University of Hong Kong.

I was so scared I thought oh, come on, CCP found me, because I have already contacted Lude for 2 days, explained things to him and persuaded him. So at that time I just quickly remove my WhatsApp and install again, removed and then turn to Skype.

I (left) all my real messages, my photo, my working place and...to Mr. Lude and I told him I won't (commit) suicide, and once I disappeared so that means the government did something, like (what) they did to Hong Kong protesters every day.

**[Bannon: ]**

Hold on, hold on... you actually told Lude:

“I am telling you right now, I will never commit suicide”

“so if I disappear, they say I got depressed too much. I ended up being dropping off a building”

“I was thrown. It was not me!”

**[Dr. Yan: ]**

Yes, because this is a war that all the Hong Kong protesters know, and they've been told this to their friends, their family. Because the Hong Kong government, the policemen, they said that these people died naked in the sea or they suddenly suicide without willing letter(s). But there's nothing suspicious. They (committed) suicide, so this happens every day in China.

**[Bannon: ]**

Then this is the 19th of January. If you go back, your supervisor... If I remember the interview yesterday correctly, your supervisor, around the 8th or 9th of January. Sometime in the end of the first week. You were in contact with Beijing CDC. You were continuing your investigation. You were sitting there going this is something's wrong here, and they told you about the red line and watch out. They could disappear you.

Is that you were told this or you had this discussion?

Yeah, my supervisor Leon Poon actually told me, even before he assigned me to do the second investigation. He's like warned me and to be careful “If not you will be disappeared.” And also when I feedback to him about the information not only from CDC, also from China CDC and also Wuhan and other cities' doctors.

I told him and he again told me, okay be careful and If not you will be disappeared. When they tell you, you will be disappeared. What is that, what is that phrase mean to someone that is Chinese. When they tell you will be disappeared.

Oh, that means you don't even exist in the world after a while no one will remember you. No one can see your information.

If they want to search you online, no information and your family are shut up or even they (could be) disappeared too, and no one can remember you, they are not allowed to do that.

### [Bannon: ]

This is Steven K Bannon at WarRoom pandemic. Dr. Yan and Lude, 2 heros. So if you wanna see with the face of heroism, just see on our broadcast, these two

this is the fight of the 21st century, so fight for freedom. The only way America is going to be totally free.

You have to assist the freedom of the Chinese people. This is the apparatus. the Chinese Communist Party oppresses 1.4 billion people and in doing that and that business model by the elites of the world.

They suppress and take your freedom away from the American people. The most powerful thing Trump has ever said in this entire thing: "nothing is inevitable. "Human Action and human agency will win out here. And that's the human action and human agency that you saw in Dr. Yan and Lude.

Dr. Yan, how did you...first thing, Lude. It took courage to put her up because it's controversial as you are once you do that, you essentially accusing the Chinese Communist Party of premeditated massmurder, which is all the bloody hands of the hundred thousand death throughout the world.

Didn't you think that, hey, I'm crossing a line here that I'm always criticizing these guys, but now I'm accusing of being mass murders that I'm crossing a line and I will be disappear.

Can you translate that, Dr. Yan?

**[Dr. Yan: ]**

Mr. Lude, to put it simply. Mr. Bannon would like to know.

When you put my message on your show, did you consider that it was not only a matter of passing on the information, but it's also accusing the CCP of being involved in a massmurder potentially. It was potentially going to be a massmurder and as for you did you have....did you have any concerns?

Did you consider it to be a very dangerous thing?

What were you thinking at the time?

**[Lu De: ]**

Lude: Thank you, Mr. Bannon, on January 19th. Dr. Yan sent out 5 crucial messages through our show:

First, it was already human to human transmission when there were 62 patients

Second, pandemic outbreak, it was potentially a big outbreak

Third, CCP was trying to cover up the pandemic

Fourth, the virus has strong mutation ability

Fifth, it comes from a CCP lab

The 5 things were proven to be true one by one. That's the most important. Also at the moment, in fact, it was very nerve wracking for me too, because if the information turned out to be false. Then, we would be facing a lot of accusations of spreading rumours.

**[Dr. Yan: ]**

So first, thank you Mr. Bannon...

On 19th January, Dr Yan first delivered this message to me. there are five points, which are all verified finally.

The five points...

First is a 62 cases at that time but it's already human-to-human transmission, and also there will be a big potential outbreak, and this is a

strong mutant virus, and also china government, CCP, is covering it up about the truth, and that this is not from nature. It is from the PLA's Lab. So I know it is important things at that time if I deliver the wrong message to the world.

That means I'll face a lot of accusation and later a lot of problems.

**[Bannon: ]**

Dr. Yan, are they going to willingly...knowing what you went through to find out what you found, and they said they're going to disappear you

Do you believe what the Wall Street Journal called for that the CCP will ever voluntarily turn over full access to the Wuhan lab?

**[Dr. Yan: ]**

Yeah, but I want to address another thing.

Not only (is it) related to the Wuhan virus institute. It is also related to all these kinds of research institutes controlled by CCP or influenced by that I mean even not only in mainland China. For example in my lab the WHO reference Lab base in Hong Kong, they're all controlled by CCP government, and they will do anything the CCP government wants them to do, because they dare not to against their willing.

**[Bannon: ]**

oh hang on, real quickly, we've got a couple of minutes left.

WHO, you're a WHO reference lab which essentially means you were the supervisory, the WHO's eyes and ears into mainland China from Hong Kong to keep an eye on this.

Was the WHO complicit in this cover-up into the best of your knowledge?

**[Dr. Yan: ]**

Okay the thing I know is WHO and mainland government. Actually based on our lab in Hong Kong's... It's like the bridge between them and makes them have more communication and better relationship (with) each other. So the WHO expert(s)... we have several top experts in the world in my

lab and they should, they're responsible to report these things happen(ing) in China. As a potential potential public health risk to WHO and WHO should be responsible to tell it to the world on time, in time. And what happened is when these experts...

I'm sure they (knew) it, because I directly told my supervisor and my husband. I told him, (and) he directly told Prof. Malik Peiris, but these experts did nothing, and maybe they also discussed with WHO. But the final result is they decided to collaborate with the CCP government and do nothing

And also the worst thing is later the scientists (stood) up to support “origin of nature theory” to CCP government and also helped them to do this kind of scientific lies and cheat all the world. You can come back to see how many wrong things wrong instructions coming from WHO since COVID-19

**[Bannon: ]**

You're saying lies, cover-up, collaboration with the CCP from WHO, no doubt in your mind.

**[Dr. Yan: ]**

Of course
