

John Catsimatidis interviews Dr. Yan: The virus was lab-made and intentionally released. Although it is difficult to develop antidotes or vaccines, Hydroxychloroquine is most useful for prevention. No one would know the real death toll in China as the CCP covered up the truth. The only solution for the pandemic is to hold the CCP accountable and thoroughly investigate the CCP 's labs.

[John Catsimatidis]

With us today is now famous virologist from Hong Kong. Her name is Dr. Li-Meng Yan, a Chinese researcher, specializes in virology and immunology in Hong Kong. And she came up with some new revelations. Let's see what she has to say.

Dr. Yan are you there?

[Dr. Yan]

Hi! Good morning, John.

[John Catsimatidis]

Good morning, tell us a little bit about your background.

[Dr. Yan]

Okay, I got my MD and a PhD in two top medicine universities in China. And then moved to Hong Kong for further research. So, I have changed in my (major) to the virology, immunology and vaccine development since 5 years ago.

And I work in the WHO reference lab In the University of Hong Kong, which is a top coronavirus Lab in the world with the all top coronavirus experts in the world.

[John Catsimatidis]

You came out with some revelations. And you felt ... you escaped to the United States, and you felt your life was in danger, is that correct?

[Dr. Yan]

Yes, because since the late December last year. I was assigned to a secret investigation as a representative of WHO Reference Lab by my supervisor, WHO consultant Professor Leo Poon to do the .. to see what happened about the new pneumonia happened in Wuhan, about the situation. And then later until the mid January, my discovery and including my intelligence and my knowledge and all these things got together made me shocked. But all the things I respond to my supervisor and other experts in WHO, there is no change for the whole situation.

So, I had to deliver this message out by myself. And then from January 19th, I started to contact with Mr. Lude through the YouTube and go through the YouTube to deliver the message of the truth of COVID-19, and which leads to a series of the policy change in China, including (China government) admitted the human-to-human transmission and lockdown in Wuhan, (things) like this.

And I keep doing on that because there are more and more lies and cover-ups things come out from the Chinese Communist Party and their friends, like WHO.

So, until April of this year, I was targeted by the Chinese Communist Party. They know I'm the one behind Lude to do these things. So, I got the intelligence that I will be disappeared. That's why I had to go to US

And also, the US people deserve the truth and we have to reveal the truth of COVID-19 and let people to solve this big pandemic.

[John Catsimatidis]

President Trump is working at “Warp Speed”, as he calls it. There so many people trying to develop a vaccine. But I understand this COVID-19 is so complex, and was it designed as a war item?

[Dr. Yan]

So, what I can say is I will have the second report coming out soon. So together with the first one I’ve already published, these two scientific report will present you with a whole picture about the character(s) of this novel coronavirus, the COVID-19, SARS-CoV-2 virus.

From their very unusual feature, and also how they can make it, and how expertised Chinese government and their labs are, from all these things, you will realise that this is not a natural virus, and it had been modified in the lab to target human, and it really works like that to our human beings, it makes a lot of damage.

As I said, I worked for vaccine development for years, but there is nothing related to the good medical purpose to make such virus.

So, all together and with all the other intelligence and everything. I think there is a saying in the US, you called, “If it looks like a duck, it quacks like a duck, then it (probably) is a duck, right? I think this can give you the answer to understand what kind of virus this is.

[John]

Usually when a ... government manufacturers a virus like that, they have an antidote.

Does the Chinese (government) have an antidote that they haven't told anybody about that?

[Dr. Yan]

What I can tell you is (that) it's easy, it's convenient for them to make such virus based on their material, their unique Zhoushan bat coronavirus, and the technique is not high advanced. It's even very traditional, and they have a big case of experiences.

But for vaccine development and antidote things, that's another thing.

So first, this is the enhanced version of SARS-1, so they have the character of SARS-1 and it is enhanced. But still, we know there is no vaccine about SARS-1 because SARS-1 had some very ... I mean I can say the difficult character(s) for people to solve to get a good vaccine.

So, at this moment, if you expect it from the China government. I only can tell you one word I think people can understand that China government never have any vaccine developed successfully in the history. And we Chinese people, we all know

if we have enough money, we prefer the vaccines (that) come from overseas rather than the made-in-China, designed-in-China vaccines. And it's very difficult to have the antidote.

So, at this moment, I mean all together briefly, I can say prevention is much more useful. And hydroxychloroquine, based on the data I have (and) the intelligence from China government, I can tell you it may be very ... maybe the best treatment and prevention method at this moment, although it's not magic.

[John Catsimatidis]

What is the best, at this moment, prevention. But I understand the virus is so complex that it attacks several parts of the body, not just one.

[Dr. Yan]

Almost all the organs and vessel, blood vessel.

[John Catsimatidis]

Wow, the death rate in the world is almost a million people. What is the death rate in China?

Have they been able to contain it among their own people?

[Dr. Yan]

You will never know the real death rate in China because they have thousands of ways to cover up the real numbers, to suppress the cases.

I have the first-hand information. When I started to do the investigation and also during several months (after), even until now, so all these information, I can summarize and tell you that, like they will postpone the diagnosis until the patient dies, and also they will use different way to exclude the patient's death reason from the SARS-CoV-2, and also they will even ignore the cases, ignore the patients because they're all locked down at home.

They cannot get a chance to go to hospital. So all together, we may never know the real death toll in China. But what I can tell you is, it's far more beyond the number we already know.

[John Catsimatidis]

We have heard that it was the Communist Party. Many, many people knew.

But did it go all the way to the top, or was it contained, the knowledge which was contained among a lower level of the Communist Party?

[Dr. Yan]

What I can tell you is, before I reveal it in 19 January, the cover up situation is already a well-known in many common doctors and like the CDC officers and the government, especially people in Wuhan. I mean, doctors are scared and CDC officers know they have to shut up. If not, (the) government will punish them.

And if you are talking about who makes the decision when they lockdown Wuhan, but still let people travel around the world. I think you really have to go to ask the Chinese Communist Party. They are the one(s) (who) made the decision and those people who made decisions, they can tell you why they do it and who others share the information (with) when they (were) discussing about that.

[John Catsimatidis]

Doctor , in your opinion, is that going to be a second wave, or you think it's on the way to dying out?

[Dr. Yan]

In my opinion is, I mean, this (has) already cause(d) the historic(al) pandemic. And since it's highly contagious and also don't have efficient measurement to control it. And the most important thing is, it comes from the lab, intentionally. So it can always come from the lab again and again, and even can be other type(s) of (mutation) or other type(s) of virus.

So, we should not expect with good reasons that this virus will soon get controlled and everything go(es) back to normal. No, it cannot be.

The only thing we have to solve it from the beginning is like we treat a patient. You have to know the reason of the disease then you can treat it well.

So, here the reason is the Chinese Communist Party and their lab did it. So, (we) have to hold them accountable and do the thorough investigation. That's the way to solve it.

[John Catsimatidis]

Is there anything else you want to tell the American people?

[Dr. Yan]

Oh yeah, I have published my first scientific report. Since I uploaded it to BioRxiv, the big pre-print website. Before it was published, they get a hack attacked, the DDOS, and then I quickly changed to Zenodo, which is another open access website. And again, it got hackers attacked when I publish(ed) it.

And soon my Twitter account is (was) suspended without any reason. But meanwhile there are many fake accounts under my name and using my profile, pretend to be me on Twitter established by the Chinese Communist Party and their Cyber-Military to pretend to be me and spread misinformation.

Also happened in Facebook, it does not allow me to talk, and then they write article to say my paper is nonsense without any scientific evidence to point out which part is wrong.

I show it to the public because I think everyone deserves the truth, and it's an urgent time so people can read it and can say whether the logic, the evidence is solid there and they can make their own decision.

[John Catsimatidis]

Doctor welcome to United States and stay safe. And thank you for telling the truth to the American people. And we hope to talk to you again real soon.

[Dr. Yan]

Thank you.
