Computers in the Clinic: Your Role!

A

Ask to see the screen.

Doc, I'm feeling a bit left out here. May I see what you are typing?

Of course! I'm sorry. Let's turn the screen so you can see your list of current medications.

Thanks.

B

Become involved.

It says there that I am still taking the pain medicine. That's not true. I'm not taking it anymore.

Okay. I'm glad we reviewed those medications together. We can correct that now.

C

Call for attention.

If you have something sensitive to discuss, speak up and ask for your doctor's full attention.

Doctor, this part is a bit difficult to discuss. Could we move away from the computer now?

Absolutely. Please tell me what's on your mind.

Thanks for listening.
