General Data Questions:

1. How do you acquire the data you sell?

The data comes from equity research-based analysis and re-engineering of multiple sources of public financial market records across the world. We applied proprietary methodologies, to re-engineer the data and perform company and industry research to produce highly accurate information.

2. Do you harvest data directly to produce your own proprietary data set(s) (e.g., from consumers, from App users, from companies)?

Yes, from public sources.

3. Can you provide us with the language in your agreements with the users that grants you permission to repurpose/sell/make commercial use of the data?

This is not applicable. We own 100% ownership of our data.

4. Describe your process for ensuring that information we receive does not contain personally identifiable information (“PII”) of any individual (e.g., filtering, screening).

This is not applicable, as our data does not contain any personally identifiable information.

5. Does the data set involve any data that could be covered by the Health Insurance Portability and Accountability Act of 1996 (“HIPAA”)?

No

6. Will the data provide material information (e.g., sales or revenue) with respect to any public company?

Yes

7. Do you validate the data prior to sending to the client?

Yes

8. What is your on-time delivery and data accuracy process?

We deliver the data on a set schedule and on a batch basis. Service-level agreement are available.

9. Do you have rights to resell the data?

Yes. We own 100% ownership of our data.

10. Are there any usage restrictions?

Yes. Internal Use Only. Clients are not allowed to disseminate data outside their team. Reselling of data and any using of IQ banker data as part any commercial products are not permitted.

If you use web scraping please answer the questions in the following section:

1. Do you have an internal scraping protocol?

We do not web scrape any data.
