Lesson 3 – Worksheet (E-Minor and D-Major)

Okay, make sure you watch the video first. And if needed, watch a few times until you are sure you fully understood where to put your fingers in order to play an E-Minor Chord and a D-Major Chord. Also, you may want to check the “Chord-Bank” to refresh your memory should you forget how to play these chords.

Exercises:

1. Play the E-Minor Chord 4 times in a row by strumming the chord.
2. Play the E-Minor Chord 4 times in a row by picking the strings one by one.
3. Play the D-Major Chord 4 times in a row by strumming the strings.
4. Play the D-Major Chord 4 times in a row by picking the strings one by one.

Okay, when you are comfortable with those exercises, let’s move on and do more advanced stuff now.

Advanced Exercises – use metronome at 60 beats per minute:

1. Play the E-Minor Chord 4 times (one time per beat), then switch to the D-Major Chord and play it four times (one time per beat).
2. Now repeat the exact same exercise in a continuous loop for one or two minutes, like this:

   4 x E-minor
   4 x D-Major
   …and start over….

The key here is that you play along with the metronome and keep up with the beat. This will take some time, but you will get there. If you get bored, increase the beats per minute…
