Students Attending School

Thinking about the debate around students attending school in person this fall, please tell me which of the following statements you most agree with.

Although there are some risks involved with healthy students attending school in person this fall, the harm that keeping a healthy child out of school will result in is too great and outweighs the risk.

Allowing children to attend school in person this fall is too risky and school should be only held online until a COVID-19 vaccine is widely available.

Please tell me if you agree or disagree with the following statement. In regard to the current coronavirus pandemic, the Chinese communist government bears the responsibility because early on they purposefully withheld critical information about the ease of transmission and seriousness of the disease. Due to that, China knowingly allowed the rapid spread of the deadly virus throughout the world.

**AMERICA FIRST FOR COVID VACCINE**

Do you agree or disagree with the following statement? America has built up and funded the world’s greatest medical research system. As a result the US creates far more cures and treatments for all kinds of diseases than all socialist countries, which essentially get those cures for free. If an American discovers the COVID-19 vaccine the American public should have the right to get it first, before it is offered to other countries.

Now thinking about the protests happening in many of our big cities, which of the following statements best represents your opinion?

- These protests are a result of years of injustice and inequality suffered by Americans who are minorities as a result of systemic racism in our police departments and in government in general.
- These protests have stopped being about racial injustice and have become violent riots by people who hate America and want to tear down our government and radically change American culture.

Thinking about the debate about policing in America, which of the following statements comes closest to your opinion?

- Our country was founded on the rule of law which gives us stability and order, and we cannot continue to be so without police to enforce our laws.

- We need to rethink policing in our country because much of the money we spend on police should be spent on social services, welfare programs and schools instead.

Joe Biden has proposed the single largest tax hike in American history, including raising taxes on the middle class by over two thousand dollars a year for the average family of four.

Joe Biden’s proposed tax plan would increase taxes on every income bracket, including middle class and lower income Americans.

Joe Biden’s tax plan would increase taxes by more than double of what Hillary Clinton proposed in 2016.

Joe Biden’s proposed tax plan would increase taxes by 3 trillion dollars, which would be far bigger than any tax increase in American history.

Joe Biden publicly states that he supports strict gun control, including outlawing many commonly owned firearms entirely and imposing a $200 dollar-a-year tax on all guns.

Critics of Biden point out that Biden’s age and cognitive decline will prevent him from standing up to the radical left, allowing leftist like Nancy Pelosi and Alexandria Ocasio-Cortez to run the country.

Thinking again about Joe Biden’s proposed 3 trillion-dollar tax increase, which of the following statements comes closest to your opinion?

- Biden’s tax increase would be devastating to our economy already weakened by the coronavirus and would likely push us into a serious recession.
- Biden’s tax increase probably wouldn’t have much impact overall on the economy.
- Biden’s tax increase would help our economy because it would allow the government to spend more to help people who really need it and those financially hurt by the coronavirus.
