The Distributed Battery Webinar Series

John-Ross Cromer is a master electrician with a Mechanical Engineering degree from the University of Pennsylvania, and he is a NABCEP-certified PV installer. Mr. Cromer is the author of *Solar Power Design and Development: An Introduction to Rooftop Solar*. He brings ten years of solar project experience including residential, commercial, and small utility-scale projects to his work, including an off-grid, residential-sized home.

AutoCAD 2018 Beginners 2-D Course

Parviz Heravi, P.E., S.E., is a professional engineer with over 20 years of experience in structural engineering as well as construction engineering. His specialized experience includes preliminary design feasibility studies, CADD management, structural constructability, value engineering and coastal engineering. Mr. Heravi is a registered professional engineer and a licensed building and engineering contractor. He is a member of the American Association of Civil Engineers (ASCE). Mr. Heravi earned his B.S.C.E. and M.S.C.E (Structures) from the University of Massachusetts in Amherst, MA.

Special Inspections

Sean Flint works as a project manager and technical director for O'Neill Service Group, a firm engaged in construction quality assurance inspection and materials inspection in Redmond, Washington, and an educator in several disciplines of special inspection. He began his career in special inspection in 1999 for AAR Testing Laboratory in Redmond, Washington, working on a wide variety of commercial structures. In 2012 Mr. Flint accepted the position of quality testing supervisor and technical director for O'Neill Service Group. Notable projects include the SR520 Eastside Corridor upgrades as part of the floating bridge replacement projects and the Sound Transit Link light rail S 200th Extension. In 2004 he began presenting courses for the Northwest Council of Engineering Labs, a consortium of material testing agencies in the Puget Sound region that provides classroom training for special inspectors. Courses currently presented by Mr. Flint include Concrete Placement and Batch Plant Inspection, Reinforced Concrete Inspection, Structural Masonry, Shotcrete, Lateral Wood/Cold Formed Steel Framing Inspection and Proprietary Anchors Inspection. Mr. Flint has also been part of the pilot program for the ACI/CRSI certified anchor installer program for contractors in the Puget Sound region.

Shallow Foundations

Ibraheem Shunnar is the director of engineering at The Mannik & Smith Group and has more than 20 years of experience in geotechnical engineering with expertise in specialty foundations, ground improvement, slope stability, instrumentation and waste management. He has a Master's degree in Geotechnical Engineering from the University of Michigan and is a registered professional engineer. Mr. Shunnar is the author of many articles and papers on geotechnical engineering. He was the project manager for the Fairlane Green redevelopment project, winner of the 2008 National Phoenix Award. He is also the recipient of the distinguished achievement award from the University of Michigan.

Erosion and Sediment Control

David Duvall, CPESC, has been working in the stormwater industry since 2006. He has been working with accenaGroup since 2008 where he oversees SWPPP production, inspector training, support, MS4 operations, and post construction operations. Mr. Duvall has performed hundreds of stormwater inspections on construction and industrial sites. He has also written and reviewed hundreds of SWPPP documents. He is a certified professional in erosion and sediment control (CPESC) and a certified inspector of sediment and erosion controls (CISEC). Mr. Duvall has a degree in Geography with an emphasis in Physical and Environmental Studies from Brigham Young University, and a degree in Geographic Information Systems from the University of Denver.

Webinar Instructions

Each webinar session earns continuing education credit and can be registered for individually. All attendees must log-on through their own email – attendees may not watch together if they wish to earn continuing education credit. HalfMoon Education Inc. must be able to prove attendance if either the attendee or HalfMoon Education Inc. is audited.

Certificates of completion will be provided for each webinar attended and will be sent via email in PDF form about five business days after the conclusion of the series.

Webinars are presented via **GoToWebinar**, an easy-to-use application that can be run on most systems and tablets. Instructions and login information will be provided in an email sent close to the date of the webinar. ***It is highly recommended that you download, install and test the application before the webinar begins by clicking on the link in the email.***
