

Compact Mic Stand 2.0 Sales Technical Sheet

Winner of Best in Show Summer NAMM 2018!

The Compact Mic Stand 2.0 has **9 new innovation product design upgrades!**

1. Now comes with an Extendable Boom Arm Accessory and Rugged Carry bag
2. A new feature on the Compact Mic Stand 2.0 is the **mic thread secure collar**. This is the first of its kind offered on a mic stand. We all have experienced boom attachments that wobble, even after we double check to make sure it's twisted on as far as we can possibly get it. This clever innovative addition minimizes this well-known common frustration.
3. **The new Extendable Boom Arm accessory features a superior ergonomically-friendly, angle adjustment handle** and includes a nifty "**cable tidy**".
4. **The new Rugged carry bag** is featured on both this product and the new Protégé folding Music stand. **Superior upgrades in quality design and durable backpack-grade material.**

The Tripod 2.0 has 3 significant upgrades:

5. **Bigger tubes** from top to bottom for greater stability.
6. **"Superior Pro Clutch"** – This superior design utilizes a mechanism that completely wraps the tube section and secures it firmly with a strip-resistant, easy-secure thumb screw fastener.
7. **Superior tube stops** – give more stability when tube sections are extended.
8. **This new 2.0 model also has more range:** the mic stand alone ranges from 20" to a whopping 63" and the boom arm extends further.
9. **New heavy-duty Display Boxes:** We upgraded the Display boxes with: A. thicker cardboard, B. Lock-tuck end panels that secure without tape, C. Beautiful graphics with a rear panel designated to show all of the product selling features

Product Description

When you're traveling from gig to gig with amps and pedals and cymbal stands, every chunk of metal adds up. We wanted to do our part to lighten your load, so we designed a mic stand that won't break the bank—or your back. Our **Compact Mic Stand 2.0** features our new **Superior Pro Clutch** design and **collapses down to just 20"**, but **extends to four all-metal tiers allowing for an incredible 63" of height**, all coming in at just **4.5 pounds**. In addition, it **comes with a convenient backpack-compatible carry bag**. From there, the nickel-plated 5/8"-27 mic thread at the top will happily hold any standard mic clip, microphone boom, tablet mount, or other accessory with a common mic thread attachment. Toss the telescoping boom arm on it and mic up the port on a low kick drum, stick it in front of a guitar stack, liven up the resonant head on a snare drum, or—dare we say—sing into it. The Compact Mic Stand 2.0 is solid enough to stay where you want it, but light enough to be any roadie's best pal.

NOTE: This product is not endorsed by either U2, Chris Tomlin, or Beyoncé, though it's something we'd totally tell our friends about.

INCLUDES:

- One (1) all-metal Compact Mic Stand 2.0
- One (1) telescoping boom arm
- One (1) heavy-duty carry bag
- Unending patience for vocal performances of all calibers
