

PORTABILITY GOES ORCHESTRAL

Having endured too many wobbly music stands in classrooms across the world, we knew it was time to bring our hyper-durable design sensibilities to the large ensemble.

Introducing:
the Maestro
Portable Classroom and Orchestra Stand

The Maestro orchestral music stand's anti-wobble design is made rock-solid by its steel threads and an anti-skid base which is borderline bulletproof, and decidedly pro-friendship. Simply grab the Maestro and adjust its awesome height on the fly-but unlike another orchestral stand you've used in the past, the Maestro fully packs down into its included carry bag. This is the future of large-ensemble music equipment, combining durable permanence with transportability.
