

LM10x Omnidirectional Lavalier Microphone with Miniature Condenser Capsule

POSITIONING

LM10x is a discreet, omnidirectional lavalier microphone with a miniature condenser mic capsule that provides outstanding audio reproduction. With a low-profile and lightweight clip design, the Samson LM10x is perfect for a variety of live and broadcast vocal applications. Four included adapter cables ensure an instant connection with most other popular wireless systems.

FEATURES

Pro Performance

The LM10x features a 3mm omnidirectional miniature mic capsule that captures sound evenly in all directions with limited proximity effect or off-axis coloration. The result is clear and articulate audio regardless of the position of the microphone to the sound source. Its lightweight clip design offers an unobtrusive, nearly invisible placement on ties, lapels and more.

Compatibility is Key

The LM10x includes four detachable adapter cables (1/8" [3.5mm], Hirose® 4-Pin, Switchcraft® TA3F, Switchcraft® TA4F). This makes the LM10x well suited for use with Samson wireless transmitters and most other popular wireless transmitters.

The Essential Mic Kit

The LM10x comes with a sleek protective carry case that houses the mic and other essential components. Also included is a lightweight mic clip and four standard windscreens to avoid wind noise and P-pops.

APPLICATIONS

- On-Stage Presenters
- Theater
- Education / Lectures
- Houses of Worship
- Broadcast / On-Camera Use
- Conferences / Seminars

SPECIFICATIONS
