1. Install the hitch to the bottom four bolt holes of the mounting bracket. (Figure 1)

2. Center the mounting brackets on the rear deck. Mark and drill four holes using the top two holes in each bracket. (Figure 2)

3. Bolt the brackets to the rear of the mower deck. Install the two flat washers behind the deck. (Figure 3)
4. Install the forward hitch arm to the sulky. (Figure 4)

5. Install the forward hitch arm to the hitch (Figure 5)

6. After installing the forward arm hitch, adjust the hitch up or down on the bracket to make the platform as level as possible. (Figure 6)
