

EMMETT

PERSONALIZED DIABETES HEALTH SOLUTION

Emmett is an integrated digital solution that provides unmatched insight, guidance, and support to Parents and Caregivers of children with Type 1 diabetes. Value is seen across all stakeholders:

DIABETES TECHNOLOGY IS COOL

BUT MOST CAREGIVERS

ARE NOT DATA SCIENTISTS .

CHILDREN (PATIENTS)

- Better management of their disease
- Improved health
- Increased time with parents and caregivers that isn't consumed with diabetes management

PARENTS

- Reduced cognitive demand as vast amounts of data is compiled and interpreted continuously
- Increased self-efficacy and ability to make proactive decisions due to opportunities to leverage predictive data analytics
- Consistent engagement due to a system designed for ease of use
- Increased connectedness and consistency within caregiving network

PART-TIME CAREGIVERS

- Increased connectedness within parents
- Increased self-efficacy and confidence in diabetes management support
- Ability to make proactive decisions due to opportunities to leverage predictive data

OUR INSPIRATION EMERGED FROM A DEEP, COLLECTIVE DESIRE TO SUPPORT THE REAL EMMETT, SON OF HCW'S LEAD DATA SCIENTIST AND AI EXPERT, ALONG WITH HIS FAMILY AND NETWORK OF CAREGIVERS.

CREATING CUSTOM SOLUTIONS TO ADDRESS THE MOST DIFFICULT AND COSTLY HUMAN PERFORMANCE CHALLENGES.

EMMETT

PERSONALIZED DIABETES HEALTH SOLUTION

BEING A CAREGIVER FOR SOMEONE

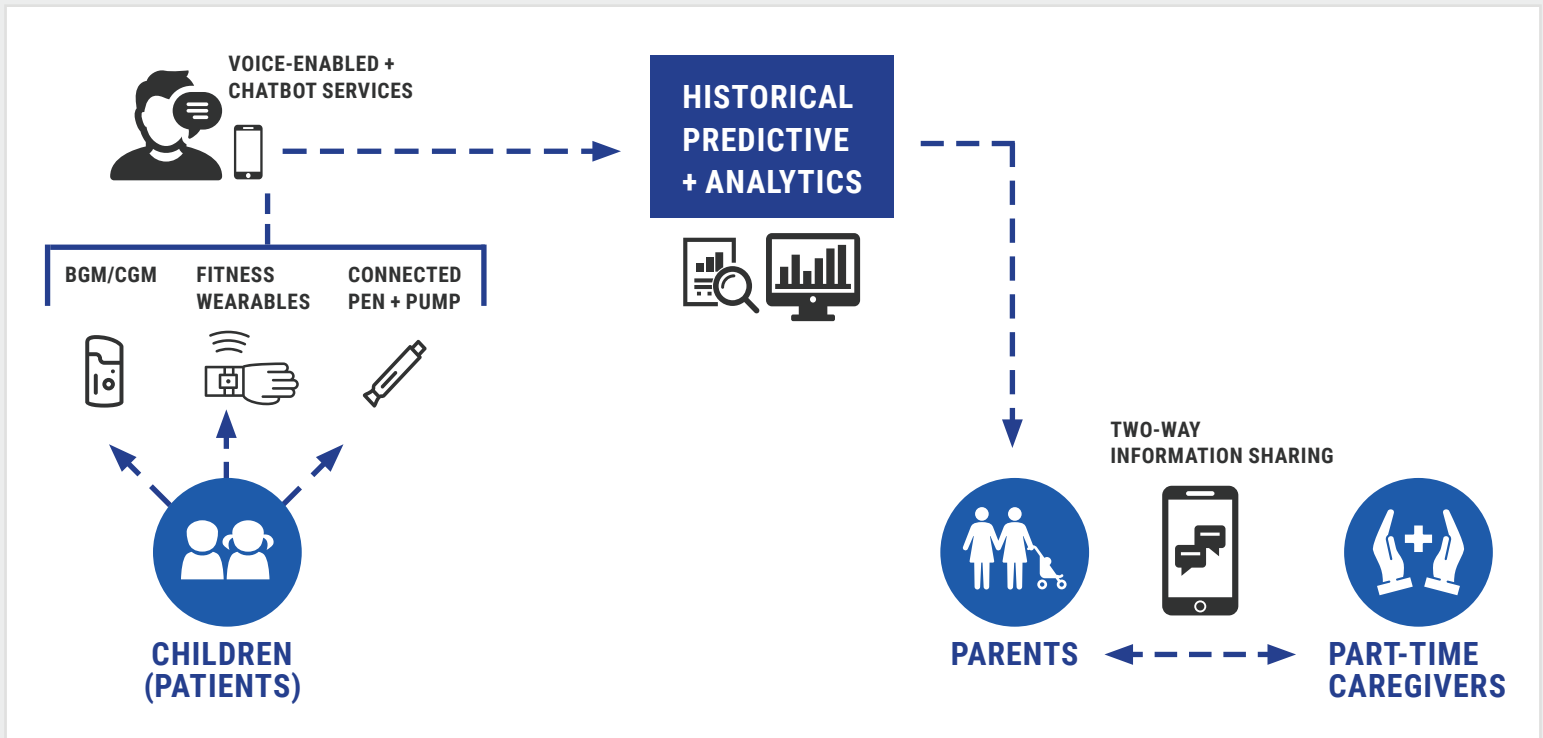

WITH TYPE 1 DIABETES IS WORK.

HARD WORK.

PARENTS, CAREGIVERS, AND
TEACHERS NEED HELP SUPPORTING
CHILDREN WITH DIABETES.

As Parents, and friends of parents, with diabetic children, we understand feeling overwhelmed by this disease. While parental resources exist, nothing tells you what specific actions to take to address your child's exact needs—managing their health successfully is ripe with moderately

informed guesses, anxiety, and fear. On top of all the stress, it's just plain hard work. Emmett addresses these challenges by integrating wearable data, leveraging simple voice driven systems, and providing personalized health recommendations.

**EMPOWERING PARENTS AND CAREGIVERS TO FIGHT
AND MANAGE DIABETES WITH DATA, NOT GUESSES**

CREATING CUSTOM SOLUTIONS TO ADDRESS THE MOST DIFFICULT AND COSTLY HUMAN PERFORMANCE CHALLENGES.
