

TRIPLE THREAT CLEANING PROGRAM

Keeping your property clean
and safe has never been easier.

STEP 1 - CLEAN

Deep-cleaning surfaces is a critical first step in any environmental cleaning program. Before an area can be properly disinfected, surfaces must be thoroughly cleaned to remove surface-level germs as well as soil, buildup, or residue that may harbor or hide additional lingering germs.

STEP 2 - DISINFECT

Once a surface has been deep cleaned, the next step is disinfection. Applying a disinfectant to hard, nonporous surfaces typically kills 99.9% or more of germs, bacteria, viruses, fungi, mold, and mildew (as indicated by the product's label). For lightly soiled surfaces, a one-step cleaner/disinfectant may be sufficient.

STEP 3 - MAINTAIN

Area maintenance is part of an overall environmental strategy that includes cleaning and disinfecting. Products that maintain are designed to keep spaces, surfaces, and objects looking and functioning their best.

With the Triple Threat Cleaning Program, keeping your property clean and safe has never been easier. HD Supply has all the products and tools you need so you can save time and resources.

STEP 1 - CLEAN

Products in this category work hard to remove stubborn grease, stains, dirt, and more to keep high contact surfaces and high-traffic areas clean and free of potentially harmful contaminants.

318832	Safeblend™ 4 L Concentrated Heavy-Duty Cleaner And Degreaser
