

For our pediatric and adolescent patients and their families:

We will be more than happy to assist your pediatrician in your or your child's medical care for acute problems. When you reach the age to transition out of a pediatric clinic, we can provide ongoing medical care for you at that time for your chronic conditions and age appropriate wellness issues.

In order to assist us with this we ask that you update us on all your medical problems, medications, and allergies at every visit. It is also a good idea to provide us with the most up to date blue slip or immunization record. Preparing ahead will make the transition from a pediatric clinic into a family medicine clinic much easier. Upon release from your pediatrician's office we may ask that you sign a medical records release form so that we may be provided with a transition of care and complete picture of your medical history.

We look forward to caring for you now and in the future.

Dr Rasmussen and staff of Headland Family Medicine
