I solemnly promise to draw, doodle, write and reflect all over this journal. I know big problems are just tiny problems stuck together and making mistakes is an important part of learning. I will ask for help and help others. I’ll ask questions and wonder. I’ll share this journal with my family and friends.

New Word!

A word you might have not heard yet.

Cut Outs

Cut out task. Pick the items from the back of the book and stick them into places with duct tape or glue.

Finished?

No problem – keep working with these prompts.

Things to ponder and think about.
The people who study computers and how to solve problems with computers are computer scientists. Computer scientists are often able to think logically. They are also curious and creative.
