Fixes

- **DSOF - 33353** - QSDI VFC cards in quad mode now correctly restore screen configuration after applying feed settings.
- **DSOF - 33254 & DSOF - 30914** - Sources of superfluous logging relating to Notch blocks and the Proof of Play feature have been removed.
- **DSOF - 33140** - DMX indirection patches can now be removed.
- **DSOF - 32463** - Keyframes may now be placed close to the start of a layer.
- **DSOF - 31896** - Designer will no longer intermittently crash to desktop on some machines.
- **DSOF - 33250** - Diagnostic graphs relating to display management now display correctly in half speed mode.
