

Fat Shark Specification Document

Model Number: 2209
Model Name: Cased TX Cam Cable 15cm (3p JST to 3p JST)
Document Revision/Date: Rev A/ 08.28.2014

Product Description:

This 15cm long 3p JST to 3p JST cable connects Fat Shark 5V cameras with the cased Fat Shark CE and FCC certified transmitters. The 15cm length makes the cable suitable for installations where the transmitter is mounted close to the camera (i.e. when mounting on the GoPro mount - Model 1614/1617). For applications requiring camera to be mounted further from the transmitter, you may consider the 30cm version - Model 2210.

Note: It is compatible with 600TVL CMOS, 420TVL CCD, 700TVL CCD, and PilotHD cameras.

Specifications:

Electrical:

- Connector: 3-pin JST 1.25
- Wire Function
 - Red Wire: Power Input
 - Black Wire: Ground
 - White Wire: Video

Mechanical:

- Length : 15 cm
- Weight: 2.5 g

Packaging:

- Packing Method: PE Plastic Bag

Operation:

Please refer to the diagram below for proper cable connecting:
