

## Fat Shark Specification Document

**Model Number:** 2210  
**Model Name:** Cased TX Cam Cable 30cm (3p JST to 3p JST)  
**Document Revision/Date:** Rev A/ 08.28.2014

### Product Description:

This 30cm long 3p JST to 3p JST cable connects Fat Shark 5V cameras with the cased Fat Shark CE and FCC certified transmitters. The 30cm length makes the cable suitable for installations where the transmitter is mounted far from the camera (i.e. placing TX out on a wing). For applications requiring camera to be mounted close in to the transmitter, you may consider the 15cm version - Model 2209.

**Note:** It is compatible with 600TVL CMOS, 420TVL CCD, 700TVL CCD, and PilotHD cameras.

### Specifications:

#### **Electrical:**

- Connector: 3-pin JST 1.25
- Wire Function
  - Red Wire: Power Input
  - Black Wire: Ground
  - White Wire: Video

#### **Mechanical:**

- Length : 30 cm
- Weight: 5 g

#### **Packaging:**

- Packing Method: PE Plastic Bag

### Operation:

Please refer to the diagram below for proper cable connecting:
